   Advanced Programming For Java 2 Platform Calvin Austin,2000   *Advanced Java 2 Platform* Harvey M. Deitel,Paul J. Deitel,Sean Santry,2002 This book looks at the exciting world of advanced programming concepts with the three major Java platforms Java 2 Enterprise Edition J2EE Java 2 Standard Edition J2SE and Java 2 Micro Edition J2ME   *Advanced Programming for the Java 2 Platform* Calvin Austin,Monica Pawlan,2000 Choice Outstanding Academic Title 2008 The uniqueness of shape as a perceptual property lies in the fact that it is both complex and structured Shapes are perceived veridically perceived as they really are in the physical world regardless of the orientation from which they are viewed The constancy of the shape percept is the sine qua nonof shape perception you are not actually studying shape if constancy cannot be achieved with the stimulus you are using Shape is the only perceptual attribute of an object that allows unambiguous identification In this first book devoted exclusively to the perception of shape by humans and machines Zygmunt Pizlo describes how we perceive shapes and how to design machines that can see shapes as we do He reviews the long history of the subject allowing the reader to understand why it has taken so long to understand shape perception and offers a new theory of shape Until recently shape was treated in combination with such other perceptual properties as depth motion speed and color This resulted in apparently contradictory findings which made a coherent theoretical treatment of shape impossible Pizlo argues that once shape is understood to be unique among visual attributes and the perceptual mechanisms underlying shape are seen to be different from other perceptual mechanisms the research on shape becomes coherent and experimental findings no longer seem to contradict each other A single theory of shape perception is thus possible and Pizlo offers a theoretical treatment that explains how a three dimensional shape percept is produced from a two dimensional retinal image assuming only that the image has been organized into two dimensional shapes Pizlo focuses on discussion of the main concepts telling the story of shape without interruption Appendixes provide the basic mathematical and computational information necessary for a technical understanding of the argument References point the way to more in depth reading in geometry and computational vision   **Introducing the Java 2 Platform** David Flanagan,1999 The Java Power Reference is a searchable browser based resource that documents all the packages and classes of the Java 2 platform on a single CD ROM Based on the clear concise quick reference style of the bestselling Java in a Nutshell the Java Power Reference provides a unique view of the functionality of the Java APIs In addition to the CD ROM the package also contains a concise printed overview of the newly released Java 2 platform   Generative Programming and Component Engineering Robert Glück,2005-09-16 This book constitutes the refereed proceedings of the 4th International Conference on Generative Programming and Component Engineering GPCE 2005 held in Tallinn Estonia in September October 2005 The 25 revised full papers presented together with 2 tool demonstration papers were carefully selected from 86 initial submissions following a round of reviewing and improvement The papers which include three full invited papers are organized in topical sections on
