

A man with dark hair, wearing a dark turtleneck sweater, is looking off to the side with a serious expression. In the background, another man in a light-colored uniform with a dark belt is partially visible. The scene is set in what appears to be an office or a room with framed pictures on the wall.

This phenomenon characterized by the EFTA Court as trademark registrations motivated by commercial greed has become typical of an era where trademark law is employed strategically to withhold or remove cultural symbols from the public domain. In an extraordinary analysis of the clash between culture and commerce and imbalances caused by protection overlaps arising from cumulative copyright and trademark protection, this book draws attention to the corrosive effect of indefinitely renewable trademark rights and underscores the necessity to safeguard central preconditions for the proper functioning of the copyright system in society at large: the freedom to use pre-existing works as reference points for the artistic discourse and building blocks for new creations, and the need to ensure the constant enrichment of the public domain. Emphasizing how overlapping copyright and trademark protection endangers the proper functioning of intellectual property rights in the literary and artistic domain, the author examines whether the intellectual property system is capable of mitigating the risks arising from cumulative protection. Such issues and topics as the following are treated in depth: the different configuration of intellectual property rights in accordance with different policy objectives and societal functions; in particular, the cultural imperative in copyright law and the market transparency imperative in trademark law; problems arising from the registration of cultural icons for use on souvenir and merchandising articles; lack of sufficient safeguards in trademark law against cultural heritage branding; current scope of trademark rights including the protection of brand value and communication functions; and the deterrent effect of trademark protection on cultural creativity. Possibility of a categorical exclusion of contemporary cultural icons and cultural heritage material from trademark protection; development of a strict gatekeeper requirement of use as a mark to prevent unjustified trademark infringement claims; development of robust culturally based defences against trademark infringement claims; and general guidelines for the regulation of protection overlaps in intellectual property law based on insights derived from the analysis of copyright trademark overlaps. Drawing on aesthetic, sociological, and economic theories that support initiatives to safeguard the autonomy of the literary and artistic domain and support remix activities of artists, the author suggests sound criteria for identifying signs with cultural significance that should be excluded from trademark registration. The book shows how intellectual property law can make rights cumulation strategies less attractive and avoid the loss of inner consistency and social legitimacy, easing the tension between indefinitely renewable trademark rights and the need to preserve and cultivate the public domain of cultural expressions and other intellectual creations that enjoy protection for a limited period of time, such as industrial designs and technical know-how. Its assessment criteria will assist and enable trademark examiners and judges to identify relevant cultural signs, and its proposals for regulatory responses to protection overlaps in intellectual property law will prove of great and lasting value to lawyers, policymakers, and scholars dealing with intellectual property law.
