the Great wore the wealth of Russia stitched in gemstones onto the front of her bodices Through the realms of art myth geology philosophy and power the story of humanity can be told through the minerals and materials that have allowed us to evolve and create From the Taiwanese national treasure known as the Meat Shaped Stone to Malta s prehistoric fat lady temples carved in globigerina limestone to the amethyst crystals still believed to have healing powers Lapidarium is a jewel box of sixty far flung stones and the stories that accompany them Together they explore how human culture has formed stone and the roles stone has played in forming human culture

[Dragon Seekers](#) Christopher McGowan,2003-08-07 **Fossil Poetry** Chris Jones,2018-08-08 Fossil Poetry provides the first book length overview of the place of Anglo Saxon in nineteenth century poetry in English It addresses the use and role of Anglo Saxon as a resource by Romantic and Victorian poets in their own compositions as well as the construction and invention of Anglo Saxon in and by nineteenth century poetry Fossil Poetry takes its title from a famous passage on early language in the essays of Ralph Waldo Emerson and uses the metaphor of the fossil to contextualize poetic Anglo Saxonism within the developments that had been taking place in the fields of geology palaeontology and the evolutionary life sciences since James Hutton s apprehension of deep time in his 1788 Theory of the Earth Fossil Poetry argues that two roughly consecutive phases of poetic Anglo Saxonism took place over the course of the nineteenth century firstly a phase of constant roots whereby Anglo Saxon is constructed to resemble and so to legitimize a tradition of English Romanticism conceived as essential and unchanging secondly a phase in which the strangeness of many of the extinct philological forms of early English is acknowledged and becomes concurrent with a desire to recover and recuperate the fossils of Anglo Saxon within contemporary English poetry The volume advances new readings of work by a variety of poets including Walter Scott Henry Longfellow William Wordsworth William Barnes Walt Whitman Ralph Waldo Emerson William Morris Alfred Tennyson and Gerard Hopkins

Against the backdrop of the Industrial Revolution an extraordinary circle of fossilists struggled to make sense of a mysterious prehistoric world a world they had to piece together from the fossilized and often fragmentary remains of animals never before seen In this transporting seamlessly written book Christopher McGowan takes us back to a time when geology and paleontology were as young and vibrant as genetic engineering is today The nineteenth century pioneers of these new disciplines were an eccentric lot from different social classes and sexes with a range of motivations in fossil hunting These Dragon Seekers sought to persuade a populace raised on a literal interpretation of Genesis that the ground they walked was once a very frightening and unfamiliar place A sweeping narrative history The Dragon Seekers shows how these remarkable characters forever changed our interpretation of the world and its inhabitants
