**The Republic of Plato** Plato,1922

**Aristotle on What Emotions Are** Giles Pearson,2024-07-31 This book provides the first systematic interpretation of what Aristotle thinks occurrent emotions are and points to some philosophical merits of his account It is argued that he holds that emotions are representational pleasures or distresses that are formed in response to other intentional states that apprehend their objects Even this bare formulation of his view is notable in several respects First the idea that the pleasures or distresses of emotions are representational directed at objects in the world or ourselves contrasts sharply with accounts that identify emotions with non representational sensations or feelings Second the notion that emotions are pleasurable or distressful responses to other intentional states that apprehend their objects provides a fundamental contrast with many current accounts which instead view emotions as in part modes of apprehension or kinds of

epistemic state themselves Third Aristotle s view stands in opposition to motivational accounts of emotions insofar as while he thinks that emotions interact with desires or motivational states in important ways he does not think they are themselves even in part motivational states They are representational pleasures or distresses alone Together these three points give Aristotle a novel understanding of the representational role emotions play namely neither descriptive nor prescriptive but reactive Besides developing these ideas both textually and philosophically the book also explores how Aristotle individuates emotion types his understanding of the material dimension of emotions and how his view can provide a novel explanation of recalcitrant emotions a notoriously problematic phenomenon for many recent accounts of emotions
