is one of the best games in town As the original short term vehicle the futures market allows the trader to collapse the time frame in which he or she can reach the desired profit target or pain threshold As a result wins and losses are compounded much more quickly than in stock trading and in the case of wins often more profitably The ability to gain leverage with very little on margin gives you the trader the ability to earn more off smaller swings And enough home runs could allow you to become your own boss work from home in your bathrobe or even work from your cell phone while lying on the beach So far so good But what does it take to win In Day Trade Futures Online award winning veteran futures trader Larry Williams gives a no holds barred view of the risks and rewards of this increasingly accessible arena His straightforward approach to helping you determine your trading personality is the first step Then he offers traders what they really need strategies and tactics designed to beat the futures markets From hardware and software setup to trading psychology and successful strategizing this highly readable book covers all the bases needed to prepare you to trade online including Assessing your risk threshold Streamlining the glut of trading and price information to make it work for you The importance of knowing how to manage your money Choosing an online broker and utilizing other online resources such as news chat rooms and message boards When to get out of your trades Building a system based on Larry s time tested strategies and that s just for starters Also included are an appendix of basic futures concepts and a select bibliography of some of the best learning resources With good humor and brutal honesty Williams guides you in building the trading system that will work best for you GET IN ON THE ORIGINAL SHORT TERM GAME WITH BIG TIME PROFITS With unflinching honesty and decades of trading experience award winning veteran futures trader Larry Williams lends his expertise to the many aspects of futures trading online including Winning strategies Determining your trading personality The art of using the Internet Hardware and software solutions History and development of short term trading Praise for Larry Williams and day trade futures online Larry Williams the astute and experienced trader has presented the reader with many computer tested patterns that should give one an edge up in the hard world of day trading He not only gives the patterns he explains the why of market action and what it takes to be successful from a psychological and money management standpoint This is one of the best practical books ever written on trading by a veteran trader Buy it John Hill President Futures Truth Co Larry possesses an incredible talent to differentiate between what is important in life as well as in the markets In his book he shares insights into market behavior and short term price dynamics that are useful to beginning and experienced traders alike Whereas most day trading books merely discuss the market in generalities Larry focuses on computer tested techniques that can actually help make traders profitable This is Larry at his best and finest Tom DeMark President Market Studies Inc author of New Science of Technical Analysis and New Market Timing Techniques Day Trade Futures Online is another must have Larry Williams trading book That s because nearly all the profitable futures traders I ve known have attributed their trading success to an idea or concept learned from Larry When Larry speaks you better listen Gary Smith author of How I Trade for a Living **Why Are You**

**Here and Not Somewhere Else** Harry L. Davis, 2013-11-04 Harry L. Davis joined the faculty of the University of Chicago Booth School of Business in 1963 and he has since become one of the most influential figures in business education in the United States and abroad. He helped develop the first core leadership program of any top-rated MBA institution in the country and the Management Lab. Davis also helped Booth pioneer its first international campus in Barcelona in 1983 where he served as deputy dean for a decade. On the occasion of the fiftieth anniversary of Davis's arrival at the Booth School, *Why Are You Here and Not Somewhere Else* offers seven essays by Davis that offer new perspectives and contribute to a more well-rounded understanding of business education. Adapted from convocation addresses given by Davis at different points during his five-decade career, the essays encapsulate the spirit of business education at the Booth School while at the same time providing encouraging, invaluable wisdom for those about to embark on business careers or take on leadership positions. Topics addressed range from the role of the university in the business world to the crucial role of intangible values in shaping one's career. Davis has been a formative influence on more executives and leaders than perhaps any other business educator living today, and *Why Are You Here and Not Somewhere Else* provides a unique and valuable perspective on how leaders in business and elsewhere can shape and define their careers in new ways.

**Victorian Investments** Nancy Henry, Cannon Schmitt, 2008-11-26 *Victorian Investments* explores the relationship between the financial system in Great Britain and other aspects of Victorian society and culture. Building on the special journal issue of *Victorian Studies* devoted to Victorian investments, this volume is the first to define an interdisciplinary field of study emerging in the space between Marxist critiques of capitalism and traditional histories of business and economics. The contributors demonstrate how phenomena such as the expansion of colonial and foreign markets, the broadening of the investor base through the advent of limited liability, and the rise of financial journalism gave rise to a culture of investment that affected Victorian Britons at every level of society and influenced every kind of cultural production. Drawing together work by prominent historians as well as literary and cultural critics, *Victorian Investments* both defines the methodologies and perspectives that characterize an existing body of scholarship and pushes that scholarship in new directions, demonstrating the signal role of economic developments in Victorian culture and society.
