Composition Instructors Survival Guide:

The Composition Instructor's Survival Guide Brock Dethier, 1999 The Composition Instructor's Survival Guide is written for the most overlooked segment of today's English departments the more than forty thousand instructors who do the actual composition teaching most of them for low pay no benefits no hope of tenure It is the first book to speak for this largely silent group to voice the anger composition instructors feel at their treatment to articulate the reasons why composition courses and teachers deserve more respect and most important to enumerate what composition instructors can do to make their jobs easier and more pleasurable

First Time Up Brock Dethier, 2005 First time up an insider's friendly question from 1960s counter culture perfectly captures the spirit of this book A short supportive practical guide for the first time college composition instructor the book is upbeat wise but friendly casual but knowledgeable like the voice that may have introduced you to certain other firsts With an experiential focus rather than a theoretical one First Time Up will be a strong addition to the newcomer's professional library and a great candidate for the TA practicum reading list Dethier author of *The Composition Instructor's Survival Guide* and *From Dylan to Donne* directly addresses the common headaches nightmares and epiphanies of composition teaching especially the ones that face the new teacher And since legions of new college composition teachers are either graduate instructors TAs or adjuncts without a formal background in composition studies he assumes these folks as his primary audience Dethier's voice is casual but it conveys concern humor experience and reassurance to the first timer He addresses all major areas that graduate instructors or new adjuncts in a writing program are sure to face from career anxiety to thoughts on grading and keeping good classroom records Dethier's own eclecticism is well represented here but he reviews with considerable deftness the value of contemporary scholarship to first time writing instructors many of whom will be impatient with high theory Throughout the work he affirms a humane confident approach to teaching along with a true affection for college students and for teachers just learning to deal with them

Literacy, Sexuality, Pedagogy Jonathan Alexander, 2008-03-15 Despite its centrality to much of contemporary personal and public discourse sexuality remains infrequently discussed in most composition courses and in our discipline at large Moreover its complicated relationship to discourse to the very languages we use to describe and define our worlds is woefully understudied in our discipline Discourse about sexuality and the discourse of sexuality surround us circulating in the news media on the Web in conversations and in the very languages we use to articulate our interactions with others and our understanding of ourselves It forms a core set of complex discourses through which we approach make sense of and construct a variety of meanings politics and identities In *Literacy Sexuality Pedagogy* Jonathan Alexander argues for the development of students sexual literacy Such a literacy is not just concerned with developing fluency with sexuality as a hot topic but with understanding the intimate interconnectedness of sexuality and literacy in Western culture Using the work of scholars in queer theory sexuality studies and the New Literacy Studies Alexander unpacks what he sees as a crucial if often overlooked dimension of literacy the fundamental ways in which sexuality has become a key component of contemporary literate practice of the stories we tell about ourselves our communities and our political investments Alexander then demonstrates through a series of composition exercises and writing assignments how we might develop students understanding of sexual literacy Examining discourses of gender heterosexuality and marriage allows students and instructors a critical opportunity to see how the languages we use to describe ourselves and our communities are saturated with ideologies of sexuality Understanding how sexuality is constructed and deployed as a way to make meaning in our culture gives us a critical tool both to understand some of the fundamental ways in which we know ourselves and to challenge some of the norms that govern our lives In the process we become more fluent with the stories that we tell about ourselves and discover how normative notions of sexuality enable and constrain narrations of identity culture and politics Such develops not only our understanding of sexuality but of literacy as we explore how sexuality is a vital if vexing part of the story of who we are **The Prentice Hall Guide for College Writers** Prentice Hall PTR, 1995-02 The Allyn & Bacon Teaching Assistant's Handbook Stephen Wilhoit, 2003 *The Allyn Bacon Teaching Assistant's Handbook A Guide for Graduate Instructors of Writing and Literature* is designed to help new and experienced graduate teaching assistants become more effective teachers scholars and members of the profession *The Allyn Bacon Teaching Assistant's Handbook* recognizes the unique needs of graduate teaching assistants working in English departments and writing programs As both graduate students and teachers many TAs lead a divided life learning how to balance the demands they face and fill the various roles they play can be difficult if not overwhelming First time TAs face the particularly difficult task of learning how to teach while

at the same time learning how to succeed as graduate students Experienced TAs often face the problem of learning how to identify and assume their roles in the profession The Allyn Bacon Teaching Assistant s Handbook is written with both new and experienced TAs in mind It addresses the concerns new TAs face and offers advice and guidance on the basics of teaching for the first time while other advice including the material on professional development gaining administrative experience and preparing for the job market will help more experienced TAs The Handbook offers practical time tested advice that TAs can apply directly to their own classes and lives

Labor, Writing Technologies, and the Shaping of Composition in the Academy Pamela Takayoshi,Patricia Sullivan,2007 The changing nature of the workforce and the increasing presence of technologies in composition studies promise to affect not only the ways we work but the very shape of the discipline This volume takes on the challenge of thinking about the intersections of work technology and composition studies in ways that are unprecedented These areas interact in numerous and significant ways yet the focus is often on the concepts in isolation from one another Authors in this collection explore technology and labor issues across a range of institutional locations to focus on working as scholars administrators of writing programs writing across the curriculum programs assessment programs teachers workers held accountable to bureaucrats and gendered and raced workers and the future roles compositions will adopt in the university and how technology affects those identities The chapters address the nature of composition labor in a technological society the new geographies of composition variety of identity and agency that are enabled and denied academic labor outside the classroom and academy and how virtuality impacts labor They provide varied perspectives on what issues are of import and alert researchers and teachers that a serious consideration of labor and

writing technologies are needed to expand notions of what composition studies can and must be Publisher s description
