### **Abstract:**

Comparative politics is a field in political science, characterized by an empirical approach based on the comparative method. In other words, comparative politics is the study of the domestic politics, political institutions, and conflicts of countries. It often involves comparisons among countries and through time within single countries, emphasizing key patterns of similarity and difference. Arend Lijphart argues that comparative politics does not have a substantive focus in itself, but rather a methodological one: it focuses on "the how but does not specify the what of the analysis."

### **Key Words:**

### **Introduction:**

In other words, comparative politics is not defined by the object of its study, but rather by the method it applies to study political phenomena. Peter Mair and Richard Rose advance a slightly different definition, arguing that comparative politics is defined by a combination of a substantive focus on the study of

## **Comparative Study Of Politics:**

Comparative Politics Judith Bara, Mark Pennington, 2009-03-19 Bara and Pennington's edited volume successfully fills a huge void in the market for introductory textbooks to comparative politics which previously offered either descriptions of political processes and systems or overviews of the methodology of comparative analysis. By applying major political science theories to overviews of the core elements of political systems, the authors both enhance our understanding of these elements and provide readers an excellent introduction to comparative explanation. Dr David Howarth, University of Edinburgh: What is distinctive about this authoritative and comprehensive book on comparative politics is the way in which it is underpinned throughout by a theoretical analysis centred on a new institutionalist approach. Professor Wyn Grant, University of Warwick: Comparative Politics takes a fresh and original approach to the field; it examines the role of structures, rules, and norms in regulating the individual and collective behaviour of political actors. Each chapter provides a critical bibliography and key questions which will be particularly useful for students approaching Comparative Politics for the first time. Altogether, this is a comprehensive and useful read which I warmly recommend. Ian Budge, Professor Emeritus, Professor of Government, University of Essex: This is a most useful book. Teachers of comparative politics often scramble around with out-of-date textbooks and photocopies of more or less compatible articles. Here is a new book that gives an up-to-date, comprehensive and systematic introduction to the major strands of institutional thought and applies these to the major institutions, processes, and policy areas. It will be a great help for many of us, academics and students alike. Peter Kurrild Klitgaard, Professor of Comparative Politics, University of Copenhagen: This book provides a distinctive new introduction to the study of comparative politics at undergraduate level. Rich in case study material and global in coverage, Comparative Politics sets out the basic theoretical and methodological foundations for studying different political systems, as well as the key structures and actors of which they are comprised. Part One explores the nature of comparative methodology and introduces students to the major theoretical paradigms that seek to explain the operation of institutions in democratic states and facilitate comparison across different political systems. Part Two examines the institutional structures of the modern state, outlining the key features such as the electoral systems and territorial and functional divisions of government across a range of modern states. Part Three analyzes the role of key actors such as voters and parties, interest groups, and social movements, the bureaucracy, and the judiciary. This book will be an essential primer for students on first-year courses in comparative government and politics, as well as introductory courses in political science concepts and methods. Judith Bara is Senior Lecturer in Politics at Queen Mary University of London and Research Fellow in Government, University of Essex. David S Bell is Professor of French Government and Politics and Head of Social Studies and Law at the University of Leeds. Jocelyn Evans is Reader in Politics at the European Studies Research Institute, University of Salford. Catherine Needham is Lecturer in Politics at Queen Mary University of London. Comparative Politics Howard J. Wiarda, 2005 **Structuring Politics** Sven Steinmo, Kathleen Thelen, Frank Longstreth, 1992-09-25 This volume brings together original essays by scholars working on a diverse range of empirical issues but whose work is in each case informed by a historical institutional approach to the study of politics By bringing these pieces together the volume highlights the methodological and theoretical foundations of this approach and illustrates the general contributions it has made to comparative politics The essays demonstrate the potential of the approach to illuminate a broad range of issues such as how and why institutions change how political ideas are filtered

through institutional structures in the formation of specific policies and how institutional structure can have unintended effects on the shaping of policy Through these richly detailed pieces the reader is provided not only a thorough understanding of the method of analysis but also an overview of the theoretical underpinnings of the approach **Parties, Governments and Elites** Philipp Harfst, Ina Kubbe, Thomas Poguntke, 2017-04-26 Parties governments and elites are at the core of the study of democracy The traditional view is that parties as collective actors play a paramount role in the democratic process However this classical perspective has been challenged by political actors observers of modern democracy as well as political scientists Modern political parties assume different roles contemporary leaders can more heavily influence politics governments face new constraints and new collective bodies continue to form propose new ways of participation and policy making and attract citizens and activists In the light of these observations the comparative study of democracy faces a number of important and still largely unsolved questions that the present volume will address The Comparative Study of Political Elites Robert D. *Comparative Analysis Of Nations* Robert Perry, 2019-03-01 The comparative method is fundamental and critical for political scientists and especially those interested in comparative politics Such questions as how democratic is the United States how rich is Germany and how ethnically complex is Nigeria and what effects these attributes have on important political phenomena cannot be analyzed except comparatively To understand politics we need to think in terms of concepts processes behavior and authority patterns that transcend specific regions or nation states Comparative Analysis of Nations is designed to address three questions confronting the study of politics 1 What do I do once I have identified a question that I want to explore within a cross national perspective 2 How do I proceed so I adequately address this question 3 Why should I proceed with this particular study plan Perry and Robertson examine how to conceptualize operationalize measure sample analyze and evaluate these research questions In clear language they stress the logic behind basic techniques of quantitative analysis issues of measurement and hypothesis testing basic techniques of hypothesis testing tabular analysis ANOVA scatterplots bivariate regression and advanced bivariate analysis curvilinear and multiple regression The book requires no previous training in statistics or math Cross national data sets accompany the book on a CD ROM and are compatible with the popular SPSS package The data sets enable the instructor the opportunity to engage the students directly in devising their own modified models of analysis to complement and extend the demonstrations within the text In sum the text

integrates the core tools and strategies of social science analysis within a framework that highlights the quantitative study of comparative politics
