Comparing Political Communication:

Comparing Political Communication Frank Esser, Barbara Pfetsch, 2004-09-06 This volume assesses comparative political communication research and considers potential ways in which it could and should develop. Twenty experts from Europe and the United States offer a unique and comprehensive discussion of the theories, cases, and challenges of comparative research in political communication. The first part discusses the fundamental themes, concepts, and methods essential to analyze the effects of modernization and globalization of political communication. The second part offers a broad range of case studies that illustrate the enormous potential of cross-national approaches in many relevant fields of political communication. The third part paves the way for future research by describing the most promising concepts and pressing challenges of comparative political communication. This book is intended to introduce new students to a crucial dynamic field as well as deepening advanced students' knowledge of its principles and perspectives.

Comparing Political Communication across Time and Space M. Canel, K. Voltmer, 2014-10-29 By using a wide diversity of theoretical and methodological approaches and by encompassing both cross-national and longitudinal analyses, this volume sheds new light on comparative political communication research such as personalization, globalization, democratization, and the changing nature of journalism.

Comparing Political Journalism Claes de Vreese, Frank Esser, David Nicolas Hopmann, 2016-07-15 *Comparing Political Journalism* is a systematic in-depth study of the factors that shape and influence political news coverage today. Using techniques drawn from the growing field of comparative political communication, an international group of contributors analyze political news content drawn from newspapers, television news, and news websites from 16 countries to assess what kinds of media systems are most conducive to producing quality journalism. Underpinned by key conceptual themes such as the role that the media are expected to play in democracies and quality of coverage, this analysis highlights the fragile balance of news performance in relation to economic forces. A multitude of causal factors are explored to explain key features of contemporary political news coverage such as Strategy and Game Framing, Negativity, Political Balance, Personalization, Hard and Soft News. *Comparing Political Journalism* offers an unparalleled scope in assessing the implications for the ongoing transformation of Western media systems and addresses core concepts of central importance to students and scholars of political communication worldwide.

The Handbook of Comparative Communication Research Frank Esser, Thomas Hanitzsch, 2013-06-19 *The Handbook of Comparative Communication Research* aims to provide a comprehensive understanding of comparative communication research. It fills an obvious gap in the literature and offers an extensive and interdisciplinary discussion of the general approach of comparative research. Its

prospect and problems as well as its applications in crucial sub fields of communications The first part of the volume charts the state of the art in the field the second section introduces relevant areas of communication studies where the comparative approach has been successfully applied in recent years the third part offers an analytical review of conceptual and methodological issues and the last section proposes a roadmap for future research

Comparing Media Systems Daniel C. Hallin, Paolo Mancini, 2004-04-12 Building on a survey of media institutions in eighteen West European and North American democracies Hallin and Mancini identify the principal dimensions of variation in media systems and the political variables which have shaped their evolution They go on to identify three major models of media system development the Polarized Pluralist Democratic Corporatist and Liberal models to explain why the media have played a different role in politics in each of these systems and to explore the forces of change that are currently transforming them It provides a key theoretical statement about the relation between media and political systems a key statement about the methodology of comparative analysis in political communication and a clear overview of the variety of media institutions that have developed in the West understood within their political and historical context

Comparing Media Systems Beyond the Western World Daniel C. Hallin, Paolo Mancini, 2011-11-28 Comparing Media Systems Beyond the Western World offers a broad exploration of the conceptual foundations for comparative analysis of media and politics globally It takes as its point of departure the widely used framework of Hallin and Mancini's Comparing Media Systems exploring how the concepts and methods of their analysis do and do not prove useful when applied beyond the original focus of their most similar systems design and the West European and North American cases it encompassed It is intended both to use a wider range of cases to interrogate and clarify the conceptual framework of Comparing Media Systems and to propose new models concepts and approaches that will be useful for dealing with non Western media systems and with processes of political transition Comparing Media Systems Beyond the Western World covers among other cases Brazil China Israel Lebanon Lithuania Poland Russia Saudi Arabia South Africa and Thailand

Advancing Comparative Media and Communication Research Joseph M. Chan, Francis L. F. Lee, 2017-06-26 A comparative approach to media and communication research plays an important if not indispensable role in achieving a core mission of researchers to delimit the generality and specificity of media and communication theories enabling researchers to more readily identify the influence of social political and cultural contexts in shaping media and communication phenomena To de Westernize and internationalize media and communication studies has thus become the way forward for overcoming the parochialism of mainstream media and communication studies This volume reflects on what comparative media and communication research has achieved or failed to achieve the epistemological and theoretical challenges it is facing and the
