Analytical methods, formation mechanisms and control strategies for endogenous hazardous substances produced during the thermal processing of foods Hongshun Yang,Jie Zheng,Hao Dong,2023-03-01 *Business Strategy and Competitive Advantage* Jovo Ateljević,Dženan Kulović,Filip Đoković,Mirza Bavčić,2023-03-24 Michael Porter is recognized as one of the top authorities on corporate strategy and business competition The historical review of strategic management clearly shows that Porter s research has bridged up two general paradigms before and after the 1980s thus helping both researchers and practitioners to better understand unanticipated global changes His two generic strategies costs and diversification the two interdependent strategic options are key in the context of the competitiveness of orthodox microeconomic theory This is where Porter went further constructing a popular value chain concept that provides the ability to disaggregate the key activities of business process in creating products and services in terms of cost analysis and value creation This book is a collection of seven

interconnected chapters that provides a coherent understanding of Michael Porter's contribution to the field of strategic management. It addresses key changes and challenges in the global business environment. The value chain concept has become highly applicable in both theory and practice. In the book, the authors offer an original interpretation of the Porter's research on strategic management in order to unravel or simplify his key theoretical concepts. It will be of interest to researchers, academics, practitioners, and students in the fields of strategic management and international business.

Theory of Urban Space Development Jin Duan, 2024-08-29. This book is a systematic monograph on urban space development theory, exploring the laws of urban space development and the basic principles of planning and design. It clarifies the connotation and methods of urban space development research, highlights the deep structure and four laws of urban space development, expounds the obvious characteristics of urban and regional forms, and discusses the interventional role of urban planning and the development mode of Chinese urban space. It also discusses the methodological change of modern urban design and forms the principles and core content of China's national spatial planning. Guided by the fundamental principles and methods of development theory, this book follows logical progression from concept to method, from deep structure to manifest form, from macro to micro, and from law to planning. By providing readers with a comprehensive and systematic urban space development research system, this book is a valuable read for both researchers and graduate students in urban studies and architectural design. The translation was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.
