Excerpt from *Complete Geography Commerce* A work on geography that seeks to lay a broad basis for the study of nations must throw a strong search light upon their commercial relations Commerce and the related industries take a leading place in this book those of our own country being illustrated by twenty two colored maps prepared expressly for this work The intelligent study of a country s natural resources must be based on knowledge of its physical features For this reason the surface forms and the climate of the various parts of the world receive full treatment in the text the maps and the pictures The natural regions of the United States are made to serve as a basis for the comparative study of other lands Order of Lessons Though most teachers using this book will doubtless present the lessons in the order in which they appear yet those who wish to complete the study of the United States in detail before showing the broader relations of our country to other lands can readily do so The work is so arranged that pupils can go directly from the early lessons on the physical features and resources of our country pages 30 to 52 to the study of its people its government and its industries pages 123 et seq About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **New Complete Geography (Classic Reprint)** Matthew Fontaine Maury,2017-11-20

Excerpt from *New Complete Geography* We have decided to teach these features objectively on a plan that has been highly commended For instance Instead of devoting two or three pages of text to the origin of mountains A subject in which the average child takes no interest we give in the general presentation of the physical geography of the earth four pictures of mountains and under each picture give a brief description of the origin and character of the formation The same course has been followed with reference to other physical features The pupil will read these descriptions because of his interest in the

picture and will remember them for life because of their association with it About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
