## **Communication Studies:**

*Microhistories of Communication Studies* Pat Gehrke, 2018-04-19 The story of an academic discipline is usually conveyed in grand movements and long spans but it can also be told through the lives of individual scholars through the development of specialties through the creation and change of departments and through the formation and transformation of organizations Using twelve histories of micro dimensions of communication studies this volume shows how sometimes small decisions single scholars individual departments and marginalized voices can have dramatic roles in the history and future of an academic discipline As a compilation of micro histories with macro lessons this volume stands alone in communication studies Read as a companion to *A Century of Communication Studies* the National Communication Association's centennial volume it offers rich detail missing links and local narratives that fully flesh out the discipline In either case no education in communication studies is complete without an understanding of the themes challenges and triumphs embodied by the twelve micro histories offered in this book This book was originally published as two special issues of *Review of Communication*

*Transformative Communication Studies* Omar Swartz,2008-01-01 This interdisciplinary collection of essays charts intersections between communication cultural studies and a variety of emergent emancipatory and liberatory discourses Every essay attempts in one way or another to speak to the following questions What would a theory of liberation look like that is premised on a communication view of the world How would such a view expand and even redefine our understanding of liberation Finally how would such a view enlarge our understanding of what is collectively communally and organizationally possible In other words the chapters articulate what can be loosely considered a humanist theory of communication and praxis The goal is to move beyond discourses of liberation that are grounded in essentialist assumptions and to move the conversation toward an engaged criticism on cultural and social levels that facilitates and encourages progressive action This edited collection thus has as its

goal a theory of human liberation grounded in communication as a resource for social and spiritual transformation The chapters comprise a mix of conceptual and applied studies that interrogate the communicative practices that naturalize our hierarchical world reifying and stultifying our moral and political imaginations As an antidote to this problem the contributors consider the importance of uncertainty and contingency in the development of human potential Rather than fearing uncertainty and contingency and allowing that fear to control us contributors argue that we should find within these conditions the source of our humanity and the strength to question and resist unjust social reifications When we do this we will rediscover the power of communication and regain an agency and control over our lives We then can start the difficult but humanizing process of constructing the world anew Case study exemplars of this construction thus are showcased
