A Jungian Study of Shakespeare M. Fike, 2009-02-02 Employing the analytical psychology of Carl Jung, Matthew A. Fike provides a fresh understanding of individuation in Shakespeare. This study of the visionary mode, Jung's term for literature that comes through the artist from the collective unconscious, combines a strong grounding in Jungian terminology and theory with myth criticism, biblical literary criticism, and postcolonial theory. Fike draws extensively on the rich discussions in the *Collected Works of C. G. Jung* to illuminate selected plays such as *A Midsummer Night's Dream*, *The Merchant of Venice*, *The Henriad*, *Othello*, and *Hamlet* in new and surprising ways. Fike's clear and thorough approach to Shakespeare offers exciting original scholarship that will appeal to students and scholars alike.

It surveys the history of religious studies and the key disciplinary approaches, explains why the study of religion is relevant in today's world, highlights contemporary issues such as globalization, diaspora, and politics, includes annotated reading lists, a glossary, and summaries of key points to assist student learning.
