Competency to Stand Trial: a Guidebook for Defendants Ray Kim, 2014-09-12. The correctional system has become the largest provider of mental health care in our society. Due to the prevalence of mental disabilities in the criminal justice system, many defendants are found Incompetent to Stand Trial. However, defendants do not usually understand what it means to be incompetent, let alone what to do about it. The purpose of this guidebook is to help defendants better understand why they were found incompetent, what they can do about it, and how to get the best possible outcomes. In addition to giving a general overview, materials are provided to assist in the restoration of competency. This guidebook should be used in conjunction with professional forensic services.

The American Psychiatric Publishing Textbook of Forensic Psychiatry Robert I. Simon, Liza H. Gold, 2004. General clinicians conduct most forensic psychiatric examinations and provide most psychiatric testimony. Yet these clinicians often receive little or no training in forensic psychiatry, leaving them ill prepared to meet the inevitable ethical and legal challenges that arise. Both timely and informative, this textbook is the first reference designed and written for both the general clinician and the experienced forensic psychiatrist. Here, 28 recognized experts introduce the forensic subjects that commonly arise in clinical practice. Unique in the literature, this outstanding collection covers: Introductory subjects; Organized psychiatry and forensic practice; the legal system and the distinctions between therapeutic and forensic roles; business aspects of starting a forensic practice; the role of the expert witness; the differences between the ethics of forensic and clinical psychiatry; the use of DSM in the courtroom and issues that arise in working with attorneys; Civil litigation: The standard of care and psychiatric malpractice; civil competency issues in conducting evaluations for personal injury litigation; personal injury claims of psychiatric harm and disability; determination and other employment related psychiatric evaluations; Criminal justice: Competency to stand trial and insanity evaluations; the use of actuarial and clinical assessments in the evaluation of sexual offenders; psychiatry in correctional settings and the relationship between psychiatry and law enforcement including mental health training, crisis negotiation, and fitness for duty evaluations; Special topics: Assessment of malingering; evaluations of children and adolescents; violence risk assessments; the use of prediction instruments to determine dangerousness; and the evolving standard of expert psychological testimony. Each chapter is organized around case examples and includes a review of key concepts, practical guidelines, and references for further reading. A study guide is also available for use in teaching in studying and in preparing for the forensic board examination. This practical textbook makes this interesting specialty accessible to trainees and seasoned practitioners. With its detailed glossary of legal terms, subject index, and index of legal cases, it will be a welcome addition to all psychiatric residency and forensic fellowship programs.
