

# Job Interview Guide: How to Ace an Interview

## Tips and strategies for successful interviewing

A successful job search has many components: an effective search strategy, a compelling resume and cover letter, and sharp job interview skills. If you're getting a lot of phone screens and first interviews but no job offers, it might be time to examine the last part of the equation: your interviewing techniques.

Get insight into the process and set yourself up for a successful job interview.

## How to Make the Best Interview Impression

To impress your interviewers, you'll need to be able to demonstrate that your qualifications and experience make you the best candidate for the job. This means knowing what they're looking for, understanding what you have to offer, and being able to quantify your successes. It also means coming across as a likable person who will fit in well with the team and help the company achieve its goals.

Needless to say, communicating all these things during a relatively short conversation can be challenging.

## What to Do Before the Interview

**Research the Company.** Gathering background information on a prospective employer is crucial to successfully preparing for an interview.

Your first step is to review the employer's website, especially the About Us section. Take a look at the company's social media presence, too. This will give you insight into how the company wants the public to perceive it. Research the company's history, its position in the market, and new developments, particularly recent or planned changes that could affect your role. Don't be afraid to request additional details about the position at hand, too.

When you demonstrate your knowledge about the organization during an interview, it shows genuine interest, which is what interviewers want to see.
