Investigating the Ordinary Sarah E. Price, Philip J. Carr, 2024-07-09 Focusing on the daily concerns and routine events of people in the past Investigating the Ordinary argues for a paradigm shift in the way southeastern archaeologists operate Instead of dividing archaeological work by time periods or artifact types the essays in this volume unite separate areas of research through the theme of the everyday

Trend, Tradition, and Turmoil David Hurst Thomas, Matthew C. Sanger, David G. Anderson, 2010 The late Archaic of the American Southeast is typically described as a time of population growth innovative developments in subsistence strategies and increased social complexity Although it is difficult to generalize many early Woodland communities are characterized as relatively small scale fairly mobile foragers organized into unranked or minimally ranked lineages and clans Early Woodland groups also seem to be more socially isolated than their late Archaic predecessors with a decline in regional exchange networks The papers in this volume were presented at a conference entitled What Happened in the Late Archaic which was co sponsored by the American Museum of Natural History and the St Catherines Island Foundation and held on St Catherines Island Georgia May 9 11 2008 The Third Caldwell Conference invited the participants to engage the appropriate archaeological data from the American Southeast specifically addressing the nature of change during the late Archaic early Woodland transition This volume consists of a dozen substantive papers followed by three discussant contributions

Technological Choices and Material Meanings in Early and Middle Bronze Age Hungary Attila Kreiter, 2007 This study assesses patterns in technological choices for key cultural groups in Bronze Age Hungary through macroscopic and petrological analyses of ceramic assemblages with a focus on understudied categories such as storage vessels Technological style results in a characteristic

way of making pottery through communication of values and beliefs through the generations If technological difference can be identified and is seen as distinctive to a specific cultural group then it follows that by comparing technological traditions it may be possible to distinguish between the different social dynamics of contemporary societies Similarities allow us to assess the nature of social relations between communities This may call into question how traditional studies have constructed typologically defined cultural groups and provide a less fragmented picture of the Bronze Age of Hungary Thus this research is not a methodological study of provenancing ceramics but tries to answer specific archaeological questions through scientific methods

Reconstructing Human-landscape Interactions Lucy Wilson, Pamela J. Dickinson, Jason Jeandron, 2007 *Reconstructing Human Landscape Interactions* demonstrates the high quality of work presented at the first Developing International Geoarchaeology conference DIG 2005 held in Saint John New Brunswick Canada and exemplifies the over riding theme of this discipline People have always used the landscape in many ways as a place to live as a place to grow crops as a source of natural resources Those actions leave their traces The characteristics of the landscape constrain which activities are possible just as social and cultural habits condition people TM s connection with the environment Geoarchaeology is about finding the traces of these interactions and using them to reconstruct how people in the past behaved in their environmental context The material covered in the proceedings ranges from broad themes of climate change and landscape use to more specific subjects such as river avulsion and the use of tidal ponds The papers move us from the land to the coastal margin and back onto land to examine particular techniques The final paper leads us beyond archaeology and points out that geoarchaeological data must contribute to the debate about the sustainability of present day land use practices a fitting challenge to take us into the future
