**Growing your Property Partnership** Kim Tasso, 2017-09-08 Being the best agent or surveyor does not always mean that you will be the best manager or leader. But being an agent, surveyor, or other property professional probably means that you are averse to taking time out to learn about management. This book is a pragmatic introduction to alternative growth strategies and management solutions in planning, leadership, human resources, strategic marketing, promotion, selling, clientology, relationship management, and achieving change. It is packed with ideas and checklists to spur you along with guidance on analysis, motivation, networking, branding, service development, persuasion, project management, rapport, tendering, and an A-Z of promotional tools. The book tackles many of the key issues faced by those who manage and direct their professional firms, from preparation of business plans to leadership strategies and client relationship management.

**Dynamic Practice Development** Kim Tasso, 2006-01-01 *Knowledge Management in Developing Economies* Kate Hutchings, Kavoos Mohannak, 2007-01-01 This important book brings together a set of original key contributions to knowledge management in developing economies. It encompasses a wide range of countries throughout Africa, Asia, the Middle East, and Latin America, as well as the transition economies of the former socialist countries in Eastern Europe. These carefully selected country case studies represent a broad range of issues in managing knowledge. They consider the way in which knowledge management processes and practices are influenced by local culture and institutions, as well as by interaction with the broader international community. The need for an aggregated analytical approach in untangling the increasingly complex process through which knowledge processes are created, transferred, and deployed is also highlighted. The book provides a strong nexus between theory and practice by offering solutions to problems such as minimising knowledge leakage, creating knowledge sharing cultures, and promoting management learning. Presenting the latest research on intercultural knowledge management, this book will be warmly welcomed by researchers, students, and lecturers with an interest in international management and knowledge management. Its strong focus on practitioner implications will provide international managers with invaluable suggestions on how to maximise knowledge sharing in international joint ventures and subsidiary operations.

**Dynamic Practice Development** Kim Tasso, 2003 There are several books about promoting your practice, but nothing about selling it, with which many professionals feel uncomfortable. The book fills the gap. This is a much needed book which addresses the unique concerns of professionals who wish to sell their services successfully and to feel comfortable about doing so.

**The Dynamics of Development and Development Administration** Kempe R. Hope, 1984-06-19 Kempe Ronald Hope provides for the first time a clear analysis and synthesis of economics and development administration.

as well as an appraisal of the problems associated with the application of these concepts in Third World nations Combining both theory and practice and providing concrete examples Hope begins by detailing the evolution of the concept of development from the inter war years through the 1950s when the expression Third World first emerged to the 1970s and the present when wholesale technology transfer and other new approaches emphasizing economic independence began to take precedence The chapters that follow chart the history of modern development administration focusing on important issues such as the role of the development administrator in the implementation of public policy the function of the public servant versus that of the politician bureaucracy in government and the increasing need for technical personnel to carry out development policies
