**Kent Greenfield**

## **Choice Responsibility:**

The Myth of Choice Kent Greenfield, 2011-10-11 Americans are fixated on the idea of choice Our political theory is based on the consent of the governed Our legal system is built upon the argument that people freely make choices and bear responsibility for them And what slogan could better express the heart of our consumer culture than Have it your way In this provocative book Kent Greenfield poses unsettling questions about the choices we make What if they are more constrained and limited than we like to think If we have less free will than we realize what are the implications for us as individuals and for our society To uncover the answers Greenfield taps into scholarship on topics ranging from brain science to economics political theory to sociology His discoveries told through an entertaining array of news events personal anecdotes crime stories and legal decisions confirm that many factors conscious and unconscious limit our free will Worse by failing to perceive them we leave ourselves open to manipulation But Greenfield offers useful suggestions to help us become better decision makers as individuals and to ensure that in our laws and public policy we acknowledge the complexity of choice

*Participation, Responsibility and Choice* Janet Newman, Evelien Tonkens, 2025-10-01 Responsibility participation and choice are key policy framings of active citizenship summoning the citizen to take on new roles in welfare state reform This volume traces the emergence of new discourses and the ways in which they take up and rework struggles of social movements for greater independence power and control It explores the changing cultural and political inflections of active citizenship in Germany Finland Norway the Netherlands France Italy and the UK with ethnographic research complementing policy analysis The editors then look across the volume to assess some of the tensions and contradictions arising in the turn to active citizenship Two final chapters address the reworking of citizen professional relationships and the remaking of public private and personal responsibilities with a particular focus on the contribution of feminist research and theory

*Responsibility Collapses* Stephen Kershnar, 2023-12-01 Our worldview assumes that people are morally responsible Our emotions beliefs and values assume that a person is responsible for what she thinks and does and that this is a good thing This book argues that this worldview is false It provides four arguments for this conclusion that build on the free will and responsibility literatures in original and insightful ways Foundation No one is responsible because there is no foundation for responsibility A foundation for responsibility is something for which a person is responsible but not by being responsible for something else Epistemic Condition No one is responsible because no one fulfills the epistemic condition necessary for blameworthiness Internalism If a person were responsible then she would be responsible for and only for what goes on in her head Most of the evidence for responsibility says the opposite Amount No one is responsible because we cannot make sense of what makes a person more or less praiseworthy or blameworthy There is no other book that argues against moral responsibility based on foundationalism the epistemic condition and internalism and shows that these arguments cohere The book s arguments for internalism and quantifying responsibility are new to the literature Ultimately the book s conclusions

undermine our commonsense view of the world and the most common philosophical understanding of God morality and relationships Responsibility Collapses Why Moral Responsibility Is Impossible is essential reading for scholars and advanced students in philosophy religious studies and political science who are interested in debates about agency free will and moral responsibility *Kierkegaard's Existential Approach* Arne Grøn, René Rosfort, K. Brian Söderquist, 2017-04-24 Recently there has been a growing interest not only in existentialism but also in existential questions as well as key figures in existential thinking Yet despite this renewed interest a systematic reconsideration of Kierkegaard's existential approach is missing This anthology is the first in a series of three that will attempt to fill this lacuna The 13 chapters of the first anthology deal with various aspects of Kierkegaard's existential approach Its reception will be examined in the works of influential philosophers such as Heidegger Gadamer and Habermas as well as in lesser known philosophers from the interwar period such as Jean Wahl Lev Shestov and Benjamin Fondane Other chapters reconsider central notions such as anxiety existence imagination and despair Finally some chapters deal with Kierkegaard's relevance for central issues in contemporary philosophy including naturalism self constitution and bioethics This book is of relevance not only to researchers working in Kierkegaard Studies but to anyone with an interest in existentialism and existential thinking

**Corporate Social Responsibility and Employer Attractiveness** Silke Bustamante, Fabio Pizzutilo, Martina Martinovic, Susana Herrero Olarte, 2021-12-19 This book investigates the preferences of young job seekers for different aspects of corporate social responsibility CSR in comparison to other non CSR related employer attributes It takes into account the potential influence of cultural and socio economic variables and provides a differentiated global perspective In its first part the book gives an overview about the impact of CSR on employer attractiveness and explains the factors that potentially influence CSR preferences of young job seekers all over the world In a second part the research design is outlined and employer related preferences of 4783 graduates and students coming from 22 countries across the globe are discussed In the third part research results are presented for different cultural clusters The most important criteria for employer choice of respondents are reflected against the socio economic background and against the characteristics of CSR of the countries in question Finally the results are summarized and implications for global employer branding are derived

**On Responsibility** James Cranbrook, 1874

**Mechanical Choices** Michael S. Moore, 2020-05-08 Mechanical Choices details the intimate connection that exists between morality and law the morality we use to blame others for their misdeeds and the criminal law that punishes them for these misdeeds This book shows how both law and morality presuppose the accuracy of common sense a centuries old psychology that defines people as rational agents who make honorable choices and act for just reasons It then shows how neuroscience is commonly taken to challenge these fundamental psychological assumptions Such challenges four in number are distinguished from each other by the different neuroscientific facts from which they arise the fact that human choices are caused by brain events the fact that those choices don't cause the actions that are their objects but are only epiphenomenal

to those choices the fact that those choices are identical to certain physical events in the brain and the fact that human subjects are quite fallible in their knowledge of what they are doing and why The body of this book shows how such challenges are either based on faulty facts or misconceived as to the relevance of such facts to responsibility The book ends with a detailed examination of the neuroscience of addiction an examination which illustrates how neuroscience can help rather than challenge both law and morality in their quest to accurately define excuses from responsibility

**Responsible Decision Making** Laszlo Zsolnai,2011-12-31 What should I do How should I deal with this How should I behave How should I act we ask ourselves daily But this is only the first part of the sentence while the full sentence is What should I do to achieve such and such for example to complete an assigned task to do well before my boss or a client to be pleased with myself to carry out my plans to make money in the stock market to pass an exam to complete an application etc These and similar questions that people ask consciously or not openly or not are decisions What skills must we master especially when there is a need to make not only elementary decisions but also decisions that affect the existence health and even lives of people First Laszlo Zsolnai writes that we should acquire the skill of gaining knowledge Only then will we stand a chance of reacting to things that are improbable today but could become a fact tomorrow Also essential is the skill of designing i e preparing actions conceptually in order to make decisions before irreversible changes occur Finally it is essential to master the skill of multidimensional judgment within the space defined by effectiveness efficiency and ethics This is Zsolnai s attempt to build a model of making ethical decisions both effectively and efficiently Therefore the model is much broader than purely an analytical framework would be It must tell us how to act rather than limit us to reflection on actions already performed it must combine decision and praxiological analysis of human conduct The proposed model enlarges the scope of the debate and suggests new avenues of both rational and responsible decision making This is an original statement of the crossover of policy and morality
