Conscience Of A Profession:

Conscience of a Profession Howard Swan, 1987 **Conscience of the Profession** Eli Mason, 2004 [Social Justice Isn't What You Think It Is](#) Michael Novak, Paul Adams, 2015-11-03

What is social justice For Friedrich Hayek it was a mirage a meaningless ideological incoherent vacuous cliché He believed the term should be avoided abandoned and allowed to die a natural death For its proponents social justice is a catchall term that can be used to justify any progressive sounding government program It endures because it venerates its champions and brands its opponents as supporters of social injustice and thus as enemies of humankind As an ideological marker social justice always works best when it is not too sharply defined In *Social Justice Isn't What You Think It Is* Michael Novak and Paul Adams seek to clarify the true meaning of social justice and to rescue it from its ideological captors In examining figures ranging from Antonio Rosmini Abraham Lincoln and Hayek to Popes Leo XIII John Paul II and Francis the authors reveal that social justice is not a synonym for progressive government as we have come to believe Rather it is a virtue rooted in Catholic social teaching and developed as an alternative to the unchecked power of the state Almost all social workers see themselves as progressives not conservatives Yet many of their best practices aim to empower families and local communities They stress not individual or state but the vast social space between them Left and right surprisingly meet In this surprising reintroduction of its original intention social justice represents an immensely powerful virtue for nurturing personal responsibility and building the human communities that can counter the widespread surrender to an ever growing state

This volume brings together researchers from different European countries and disciplines who are involved in Clinical Ethics Consultation CEC The work provides an analysis of the theories and methods underlying CEC as well a discussion of practical issues regarding the implementation and evaluation of CEC The first section deals with different possible approaches in CEC The authors explore the question of how we should decide complex cases in clinical ethics that is which ethical theory approach or method is most suitable in order to make an informed ethical decision It also discusses whether clinical ethicists should be ethicists by education or rather well trained facilitators with some ethical knowledge The second chapter of this book focuses on practical aspects of the implementation of CEC structures The analysis of experienced clinical ethicists refers to macro and micro levels in both developed and transitional countries Research on the evaluation of CEC is at the centre of the final chapter of this volume In this context conceptual as well as empirical challenges with respect to a sound approach to judgements about the quality of the work of CECs are described and suggestion for further research in this area are made In summary this volume brings together theorists and healthcare practitioners with expertise in CEC In this respect the volume serves as good example for a multi and interdisciplinary approach to clinical ethics which combines philosophical

McCullough, Frank A. Chervenak,1994 This book offers a comprehensive and clinically practical approach to ethics in the everyday practice of obstetrics and gynecology The topics the authors address include contraception abortion selective termination of multifetal pregnancies gynecologic cancer in vitro fertilization surrogacy prenatal diagnosis fetal therapy cephalocentesis prematurity HIV infection and court ordered cesarean delivery The issues involved in making decisions in many of these areas are a source of conflict and lead to crisis between the physician and patient One of the book s strengths is its emphasis on prevention and if prevention fails management of the conflicts and crises which arise in these areas of medicine The authors develop their preventative and management strategies on the basis of a framework for bioethics in the clinical setting This framework is rigorously established and defended The authors argue that four virtues self effacement self sacrifice compassion and integrity generate the physician s obligation to protect and promote the patient s interest They then identify the three types of patient s interests social role interests subjective interests and deliberative interests and they reinterpret the ethical principles of beneficence and respect for autonomy in terms of these The concept of the fetus as patient the physician s obligation to third parties and the moral standing of fathers and family members are also addressed The implications of their argument sets the stage for the discussions of prevention and management in the remaining sections of the book *Ethics in Obstetrics and Gynecology* is a unique addition to the literature in both biomedical ethics and obstetrics and gynecology It demonstrates that ethics should be regarded as an essential part of obstetrics and gynecology and that clinical practice is incomplete
