**Campsite** Charlie Hailey, 2008-06-01 Camping is perhaps the quintessential American activity We camp to escape to retreat to find ourselves The camp serves as a home away from home where we might rethink a deliberate life We also camp to find a new collective space where family and society converge Many of us attended summer camps and the legacies of these childhood havens form part of American culture In Campsite Charlie Hailey provides a highly original and artfully composed interpretation of the cultural significance and inherently paradoxical nature of camps and camping in contemporary American society Offering a new understanding of the complex relationship between place time and architecture in an increasingly mobile culture Hailey explores campsites as places that necessitate a unique combination of contrasting qualities such as locality and foreignness mobility and fixity temporality and permanence and public domesticity Camping methods reflect the rigid flexibility of the process leaving home arriving at a site clearing an area making and then finally breaking camp The phases of this sequence are both separate and indistinct To understand this paradox Hailey emphasizes the role of process He constructs a philosophical framework to elucidate the placefulness or sense of place of such temporary constructions and provides alternative understandings of how we think of the home and of public versus private dwelling spaces Historically camps have been used as places for scouting out future towns for clearing provisional spaces and for making semipermanent homes away from home To understand how cultures of camping develop and accommodate this dynamic mix of permanence and flexibility Hailey looks at three basic qualities of the camp as a site for place making as a populist precursor for modern built environments and as a method Hailey's creative and philosophical approach to camps and camping allows him to construct links between such diverse projects as the philosophers camps of the mid nineteenth century the idiosyncratic camping clubs that arose with the automobile culture in the early 1920s and more recent uses of campsites as temporary housing for those displaced by Hurricane Katrina In Campsite Hailey makes a singular and significant contribution to current studies of place and vernacular architecture while also reconfiguring methods of research in cultural studies architectural theory and geography
