Breast Cancer Strategies For Husbands To Support Their Wives:

Breast Cancer Jim Eckmann, 1995 Helping Couples Cope with Women's Cancers Karen Kayser, Jennifer L. Scott, 2008-02-28 Kayser and Scott have written an excellent manual for mental health practitioners who care for women with cancer To provide the best treatment for women and couples living with cancer it is imperative for the therapist to have a thorough understanding of medical treatments as well as normal responses to the experience Readers of this well written thoughtful and practical book will have both Hester Hill Schnipper LICSW BCD OSW C Chief Oncology Social Work BIDMC Author After Breast Cancer A Commonsense Guide to Life After Treatment Close relationships can be vital to a woman s recovery from breast or gynecological cancer and the myriad stressors that accompany diagnosis and treatment Helping Couples Cope with Women s Cancer shows readers not only how to enlist the patient s closest support person in coping with the disease but also to help that partner with the stressors such as feelings of inadequacy and loss that so often come with the role The authors established experts on their subject recognize the challenges couples face the central role of communication in coping and the individuality of each patient and couple In addition to proven intervention techniques and helpful assessment tools the book features case illustrations What to do if sections sociocultural considerations and suggestions for when the patient s caregiver is not her partner Key areas of coverage include Assessment quality of life impact of illness family resources Balancing work family self care and the demands of illness Cognitive coping relaxation stress reduction Body image sexuality and intimacy Helping children cope developmental guidelines Transitions goal setting life after cancer facing recurrence or terminal illness The skills and insights contained in Helping Couples Cope with Women s Cancers will benefit a range of health and mental health practitioners including counselors social workers clinical psychologists psychiatrists and nurses Graduate students planning a career in health psychology or couples therapy should also find it a valuable resource **CANCER AND THE FAMILY CAREGIVER** Ora Gilbar, Hasida Ben-Zur, 2002-01-01 This book is the product of the authors research and clinical practice in the field of psycho oncology stress and coping for a period of over twenty years It fills a gap that exists in the discussion of caregiver distress felt by both cancer researchers and psycho oncologists in the vital area of predicting acknowledging and alleviating the distress of caregivers of cancer patients and it focuses on the caregivers of cancer patients in various phases of the illness The discussion of cancer patient caregivers is divided into three aspects theoretical Part 1 research Part 2 and practical Part 3 issues The analysis of these areas can be useful to clinicians researchers medical psychological social workers and nurses by familiarizing them with the spectrum of stresses experienced by cancer patients and their caregivers and the coping methods that have proven most effective Part One presents theoretical background on the structure and progression of the caregiver role and how caregivers cope with the illness as explored in recent literature Part Two presents empirical research on caregiver psychological distress carried out by the authors during 1993 1999 Part Three examines two important issues The first is intervention for reducing

caregiver distress and the second issue is the ethical question of caregiver involvement in the patient's medical decisions. The book is timely as it is felt that the issue at hand will have mounting importance and relevance to our society as it experiences growing longevity and concomitant challenges in cancer caregiving. *Psycho-Oncology* Jimmie C. Holland, 2010-03-22

Psycho-Oncology was the first comprehensive text in the field of psychosocial oncology and remains the gold standard today. Written by 67 internationally known psychiatry and palliative care experts, the resource is truly an essential reference for all providers of palliative care. Joining Oxford Medicine Online, this resource offers the best quality content in an easy-to-access format. Online-only benefits include downloading images and figures to PowerPoint and downloading chapters to PDF.

Journal of the National Cancer Institute, 1990 **Cancer Resources**, 1997 [Patterns of Coping in Survivors of Breast Cancer and Their Partners](#) Jean M. O'Mahoney, 1997. This study explored how the coping strategies of breast cancer survivors and their partners influence their satisfaction with their relationship one to twenty-six months following completion of active treatment for breast cancer. The results indicated that coping factors play an important role in the adjustment of the couple and are predictive of relationship functioning above and beyond demographic and illness characteristics. There were differences observed, however, between the patients and partners in which coping strategies were related to relationship satisfaction. The patients' use of self-controlling coping and the partners' use of distancing were associated with lowered relationship satisfaction for the couple, whereas the partners' use of positive reappraisal was associated with higher levels of relationship satisfaction. These findings were explored as they related to gender differences in coping as well as the differential roles the patient and partner play in relation to the illness experience. The results of this study suggested that the coping process that occurs within the relationship is complex and interdependent and that coping may serve unique interpersonal functions. Future directions for research are suggested to better understand the concept of relational coping and the reciprocal process of coping with illness that occurs in couples over time. **Health Psychology, 2nd Edition** Deborah Fish Ragin, 2015-07-22. A truly interdisciplinary approach to the study of health. *Health Psychology*. An interdisciplinary approach uses the social-ecological perspective to explore the impact of five systems on individual health outcomes: individual, culture, family, social, physical environment, health systems, and health policy. In order to provide readers with an understanding of how health affects the individual on a mental and emotional level, the author has taken an interdisciplinary approach considering the roles of anthropology, biology, economics, environmental studies, medicine, public health, and sociology. [Contemporary Issues in Breast Cancer](#) Karen Hassey Dow, 1996. Intended for nurses and other health care professionals, this volume examines issues of breast cancer in the context of family, community, and culture. The eight sections cover prevention, screening, and detection, treatment, including concerns about tamoxifen and new treatments, survivorship issues.
