## **Dynamics Of Focus Structure:**

The Dynamics of Focus Structure Nomi Erteschik-Shir, 1997 In this book Nomi Erteschik Shir develops a new theory of focus structure integrating insights from syntax semantics phonology and pragmatics She explores the role of focus structure in grammar examining the interface between focus structure and syntax the semantics of focus structure and the intonation associated with it Dr Shir defines a grammatical level of f structure focus structure which is an annotated s structure in which topic and focus constituents are marked F structure feeds both PF Phonological Form and semantics and is sensitive to lexical information Dr Shir argues that f structure and not LF Logical Form is the input to a semantic rule of predication One of the major results of Dr Shir s analysis is that wh movement turns out to be subject to the same constraint which accounts for anaphora and other subject object asymmetries

**Topic-Focus Articulation, Tripartite Structures, and Semantic Content** Eva Hajicová, Barbara B.H. Partee, P. Sgall, 2013-03-09 1 1 OBJECTIVES The main objective of this joint work is to bring together some ideas that have played central roles in two disparate theoretical traditions in order to contribute to a better understanding of the relationship between focus and the syntactic and semantic structure of sentences Within the Prague School tradition and the branch of its contemporary development represented by Hajicova and Sgall HS in the sequel topic focus articulation has long been a central object of study and it has long been a tenet of Prague school linguistics that topic focus structure has systematic relevance to meaning Within the formal semantics tradition represented by Partee BHP in the sequel focus has much more recently become an area of concerted investigation but a number of the semantic phenomena to which focus is relevant have been extensively investigated and given explicit compositional semantic analyses The emergence of tripartite structures see Chapter 2 in formal semantics and the partial similarities that can be readily observed between some aspects of tripartite structures and some aspects of Praguian topic focus articulation have led us to expect that a closer investigation of the similarities and differences in these different theoretical constructs would be a rewarding undertaking with mutual benefits for the further development of our respective theories and potential benefit for the study of semantic effects of focus in other theories as well
