Breakthroughs In Practice:

Breakthroughs in Practice Lindsey Napier, Jan Fook, 2000 Professional practice is in crisis The formal theoretical knowledge on which practitioners base their practice is often outstripped by rapid changes in the contexts of this practice The unpredictability of workplace and broader contexts often renders existing traditional practices irrelevant or ineffective How can practitioners develop new ways of working which are flexible and responsive The reflective approach whereby practitioners draw out their theories of action directly from their own practice is becoming increasingly popular as a new approach which enables breakthroughs in practice impasses Yet reflectivity is often difficult to teach and learn because it challenges traditional often unquestioned paradigms of knowledge development Therefore rather than simply arguing for a reflective approach this book makes a unique contribution by actually modelling the use of the reflective approach in practice Students educators and practitioners are able to read illustrations of how individual social workers used a reflective process to break through specific dilemmas in their practice Thus they are enabled to understand a reflective approach by gaining insight into their experience of it Contributors to this volume come from Australia the United Kingdom and North America Their personal backgrounds are diverse They report on seminal experiences in a wide range of settings from community work in the Gorbals to hospice care in Sydney from child protection to work with addictions The book will appeal to Trainers and managers in social work social care and health Social work students and trainees Social work academics Professional and vocational educators generally who are interested in gaining practical insights into the development of reflective understanding Lindsey Napier is Senior Lecturer in Social Work at the University of Sydney Jan Fook is Professor of Social Work Deakin University Geelong Australia

Service Breakthroughs James L. Heskett, 1990-09-17 Discover the game changing strategies of Service Breakthroughs where Harvard Business School experts unveil innovative service management techniques breakthrough leadership insights and the self reinforcing service cycle to elevate customer satisfaction retention and profitability in competitive industries What Do Citicorp UPS and Marriott have in common They are breakthrough service providers firms that changed the rules of the game in their respective industries by consistently meeting or exceeding customer needs and expectations To find out how these companies do it service management experts James Heskett Earl Sasser and Christopher Hart put the question to the chief executive officers of fifteen of America's leading service firms attending a workshop at the Harvard Business School Breakthrough leaders they discovered think very differently about their businesses than their competitors Now in *Service Breakthroughs* based upon five years of exhaustive research in fourteen service industries Heskett Sasser and Hart show exactly what enables one or two companies in each industry to constantly set new standards for quality and value that force competitors to adapt or fail At the heart of breakthrough performance the authors contend is a sometimes intuitive but thorough understanding of the self reinforcing service cycle that replaces traditional management of trade offs The cycle is a paradigm derived from the research results suggesting

direct links between heightened customer satisfaction increased customer retention augmented sales and profit improved quality and productivity greater service value per unit of cost improved satisfaction of service providers increased employee retention and further heightened customer satisfaction With detailed examples and dramatic case studies of Mark Twain Bancshares American Airlines Florida Power and Light Federal Express McDonald s and many other companies Heskett Sasser and Hart show how this self reinforcing cycle of behavior differentiates breakthrough leaders from their merely good competitors The authors describe how breakthrough managers develop counterintuitive even contrarian strategic service visions These companies define their service concept in terms of results achieved for customers rather than services performed They target market segments by focusing on psychographics how customers think and behave instead of demographics And instead of viewing a service delivery system as a facility where the service is produced and sold breakthrough firms see it as an opportunity to enhance the quality of the service These profound differences in thought and action have brought spectacular results For managers who wish to set the pace in their service industries Service Breakthroughs is essential reading
