Beyond Digital Mario Carpo, 2023-04-18 Recasting computational design a new modern agenda for a post industrial post pandemic world Mass production was the core technical logic of industrial modernity for the last hundred years architects and designers have tried to industrialize construction and standardize building materials and processes in the pursuit of economies of scale But this epochal march of modernity is now over In *Beyond Digital* Mario Carpo reviews the long history of the computational mode of production showing how the merger of robotic automation and artificial intelligence will stop and reverse the modernist quest for scale Today's technologies already allow us to use nonstandard building materials as found or as made and assemble them in as many nonstandard intelligent adaptive ways as needed the microfactories of our imminent future will be automated artisan shops The post industrial logic of computational manufacturing has been known and theorized for some time By tracing its theoretical and technical sources and reviewing the design theories that accompanied its rise Carpo shows how the computational project long under the sway of powerful antimodern ideologies is now being recast by the urgency of the

climate crisis which has vindicated its premises and by the global pandemic which has tragically proven its viability Looking at the work of a new generation of designers technologists and producers Beyond Digital offers a new modern agenda for our post industrial future *The Civil Engineer's Pocket-book* John Cresson Trautwine,1909 *Artificial Parts, Practical Lives* Katherine Ott,David Serlin,Stephen Mihm,2002 Simultaneously critiquing historicizing and theorizing prosthetics this text lays out a balanced and complex picture of its subject neither vilifying nor celebrating the merger of flesh and machine *Engineering-contracting* ,1907 *The National Builder* ,1909 **Brick and Clay Record** ,1915 **Brick** ,1929 **The Engineering Digest** ,1908 **Industrial Engineering and the Engineering Digest** ,1908 **The Engineering Digest** Harwood Frost,Charles MacCaughey Sames,1908
