Multisensor Surveillance Systems Gian Luca Foresti, Carlo S. Regazzoni, Pramod K. Varshney, 2003-07-31 Monitoring of public and private sites is increasingly becoming a very important and critical issue especially after the recent flurry of terrorist attacks including the one on the World Trade Center in September 2001 It is therefore imperative that effective multisensor surveillance systems be developed to protect the society from similar attacks in the future The new generation of surveillance systems to be developed have a specific requirement they must be able to automatically identify criminal and terrorist activity without sacrificing individual privacy to the extent possible Privacy laws concerning monitoring and surveillance systems vary from country to country but in general they try to protect the privacy of their citizens Monitoring and visual surveillance has numerous other applications It can be employed to help invalids or handicapped and to monitor the activities of elderly people It can be used to monitor large events such as sporting events as well Nowadays monitoring is employed in several different contexts including transport applications such as monitoring of railway stations and airports dangerous environments like nuclear facilities or traffic flows on roads and bridges The latest

generation of surveillance systems mainly rely on hybrid analog digital or completely digital video communications and processing methods and take advantage of the greater flexibility offered by video processing algorithms that are capable of focusing a human operator's attention on a set of interesting situations

Intelligent Distributed Video Surveillance Systems Institution of Electrical Engineers, 2006-02-14 There is a growing interest in the development and deployment of intelligent surveillance systems in public and private locations This book consists of a selection of extended versions of presentations made in two symposia on intelligent distributed surveillance systems IDSS and brings together the latest developments in the field
