**K Morrison**

## Crystal World:

Impossibility Fiction Derek Littlewood, Peter Stockwell, 1996 Impossibility fiction is an intergenre that has recently been the resort of many writers searching for new ways of understanding and expressing the real world of the imagination making use of fantasy alternative history and science fiction Coping with ideas that are both impossible and realistically constructed is the ultimate contemporary challenge of our technology The chapters of this book move towards establishing appropriate readings that allow contemporary readers to negotiate unreality a skill that the end of the millennium is making inevitably necessary Such strategies have long been the preserve of literary and cultural study and here a number of well regarded scholars and some new to the field make their contribution to an area that has become increasingly important in recent years From Mary Shelley to Philip K Dick Iain M Banks to J G Ballard taking in African American science fiction Jurassic Park and Kurt Vonnegut and exploring issues of alternative history and ideology feminism the holocaust characterisation and impossible geography this collection is an important source book for all those interested in the literature culture and philosophy of realistic impossible worlds

**The Imperial Archive** Thomas Richards, 1993-11-17 Argues that by meeting the vast administrative challenge of the British Empire thorough maps and surveys censuses and statistics Victorian administrators developed a new symbiosis of knowledge and power The book draws on works by Rudyard Kipling H G Wells and Bram Stoker

*New Catholic World*, 1893

**Out of the Night and Into the Dream** Gregory Kent Stephenson, 1991-10-30 The author of *Empire of the Sun* and other acclaimed novels and stories British science fiction writer J G Ballard is here given a penetrating analysis his work being explored in terms of its internal coherence its continuity and development and its mythic and metaphysical aspects Ballard s fiction is widely considered to be a critique of our secular rational technological culture but this study departs from earlier ones that label him a fatalistic or nihilistic writer obsessed with entropy devolution and dissolution in showing him instead to be most deeply concerned with the redemption and regeneration of the human psyche With Ballard s focus so much on visionary perception and mystical transcendence Gregory Stephenson argues for his placement in the Romantic visionary tradition A comprehensive examination of Ballard s work this study traces his output and accomplishments over four decades exploring their thematic development Ballard is considered in relation to a number of British and American writers of the post World War II era within and beyond the often too rigidly applied categorization of science fiction as well as to poets and novelists of the past

**The Empire's of J. G. Ballard** David Ian Paddy, 2015-08-25 J G Ballard once declared that the most truly alien planet is Earth and in his science fiction he abandoned the traditional imagery of rocket ships traveling to distant galaxies to address the otherworldliness of this world The Empires of J G Ballard is the first extensive study of Ballard s critical vision of nation and empire of the political geography of this planet Paddy examines how Ballard s self perceived status as an outsider and exile the Sheppertonian from Shanghai generated an outlook that celebrated worldliness and condemned parochialism This book brings to light how

Ballard wrestled with notions of national identity and speculated upon the social and psychological implications of the post war transformation of older models of empire into new imperialisms of consumerism and globalization Presenting analyses of Ballard s full body of work with its tales of reverse colonization psychological imperialism the savagery of civilization estranged Englishmen abroad and at home and multinational communities built on crime *The Empires of J G Ballard* offers a fresh perspective on the fiction of J G Ballard *The Empires of J G Ballard An Imagined Geography* offers a sustained and highly convincing analysis of the imperial and post imperial histories and networks that shape and energise Ballard s fictional and non fictional writings To what extent can Ballard be considered an international writer What happens to our understanding of his post war science fictions when they are opened up to the language and logics of post colonialism And what creative and critical roles do the spectres of empire play in Ballard s visions of modernity Paddy follows these and other fascinating lines of enquiry in a study that is not only essential reading for Ballard students and scholars but for anyone interested in the intersections of modern and contemporary literature history and politics Jeanette Baxter Anglia Ruskin University Shanghai made my father Arriving in England after WW2 he was a person of the world who d witnessed extremes of human experience and remained the outsider observing life from his home in Shepperton 1930s Shanghai Paris of the East was a mix of international sophistication and violence unfettered capitalism and acute poverty American cars martinis and Coca Cola a place marked by death and war It had a profound influence on my father and his imagination Dr Paddy s fascinating book explores my father s fiction within an international context and offers a profound reading of a man who always kept his eyes and mind open to the world Fay Ballard

**Digressions in Deep Time** Declan Lloyd, Warren Mortimer, 2024-06-18 Deep time is a term which attempts to capture temporal scales far beyond human comprehension These are stretches of time epitomised by geological and cosmic scale processes vast enough to make the entirety of human existence appear as little more than a footnote The past few years have seen a boom in texts dedicated to the study of deep time extending across a broad range of disciplines which fall markedly outside of its geological roots These studies are unified by two ideas in particular that deep time thinking and ecocriticism should be considered in conjunction and that literature and the arts play a vital role in fostering a deep time awareness *Digressions in Deep Time* is the first collection of essays which considers the multifarious representations of deep time across literature and the arts assembling the work of a wide range of prominent scholars whose research frequently engages with temporality and ecocriticism Featured contributions include work by the Pulitzer prize winning author John McPhee who popularised the term deep time in the late seventies as well as chapters by Richard Irvine author of *An Anthropology of Deep Time* Benjamin Morgan author of *The Outward Mind* and Andrew Tate author of *Apocalyptic Fiction*
