Arguing And Justifying:

Justifying Strict Liability Marco Cappellelli,2022 The imposition of strict liability in tort law is controversial and its theoretical foundations are the object of vigorous debate Why do or should we impose strict liability on employers for the torts committed by their employees or on a person for the harm caused by their children animals activities or things In responding to this type of questions legal actors rely on a wide variety of justifications Justifying Strict Liability explores in a comparative perspective the most significant arguments that are put forward to justify the imposition of strict liability in four legal systems two common law England and the United States and two civil law France and Italy These justifications include risk accident avoidance the deep pockets argument loss spreading victim protection reduction in administrative costs and individual responsibility By looking at how these arguments are used across the four legal systems this book considers a variety of patterns which characterise the reasoning on strict liability The book also assesses the justificatory weight of the arguments showing that these can assume varying significance in the four jurisdictions and that such variations reflect different views as to the values and goals which inspire strict liability and tort law more generally Overall the book seeks to improve our understanding of strict liability to shed light on the justifications for its imposition and to enhance our understanding of the different tort cultures featuring in the four legal systems studied

Justifying the Obligation to Die

Ilan Zvi Baron,2009-06-16 One of the state s key features is its ability to oblige its citizens to risk their lives on its behalf by being sent into war However what is it about the state or its equivalent that makes this obligation justifiable Justifying the Obligation to Die is the first monograph to explore systematically how this obligation has been justified Using key texts from political philosophy and just war theory it provides a critical survey of how this obligation has been justified and using illustrations from Zionist thought and practice demonstrates how the various arguments for the obligation have functioned The obligation to risk one s life for the state is often presumed by theorists and practitioners who take the state for granted but for the Zionists a people without a state but in search of one and who have little history of state based political thought it became necessary to explain this obligation As such this book examines Zionism as a Jewish political theory reading it alongside the tradition of Western political thought and critiques how Zionist thought and practice sought to justify this obligation to risk one s life in war what Michael Walzer termed the obligation to die Finally turning to the political thought of Hannah Arendt the author suggests how the obligation could become justifiable although never entirely justified For the obligation to become at all justifiable the type of politics that the state enables must respect human diversity and individuality and restrict violence so that violence is not a continuation of politics

Inductive Logic Dov M. Gabbay,John Woods,2011-05-27 Inductive Logic is number ten in the 11 volume

Handbook of the History of Logic While there are many examples where a science split from philosophy and became autonomous such as physics with Newton and biology with Darwin and while there are perhaps topics that are of exclusively philosophical interest inductive logic as this handbook attests is a research field where philosophers and scientists fruitfully and constructively interact This handbook covers the rich history of scientific turning points in Inductive Logic including probability theory and decision theory Written by leading researchers in the field both this volume and the Handbook as a whole are definitive reference tools for senior undergraduates graduate students and researchers in the history of logic the history of philosophy and any discipline such as mathematics computer science cognitive psychology and artificial intelligence for whom the historical background of his or her work is a salient consideration Chapter on the Port Royal contributions to probability theory and decision theory Serves as a singular contribution to the intellectual history of the 20th century Contains the latest scholarly discoveries and interpretative insights

An Introduction to Deductive Argument

Analysis Anthony Waters,1982 *Lectures on the Doctrine of Justification* John Henry Newman,1892 *Arguing about Metaethics* Andrew Fisher,Simon Kirchin,2006 A contemporary collection of readings in metaethics this work discusses whether moral properties exist and how they fit into the world as science conceives it It is useful for the study of metaethics at undergraduate and postgraduate level

Brief-Writing Masterclass Chinua Asuzu,2017-05-31 An advocate submits a brief to a court or tribunal to persuade it to decide the cause or matter in favor of the advocates client or position The key word is persuade Too often advocates forget this and write to please themselves They write to themselves instead of to the court They write in chest thumping prose and style Advocates will do well to keep in mind that in advocacy persuasion is all that matters This book teaches persuasive written advocacy It shows advocates of all ranks in all jurisdictions in all proceedings before all courts or tribunals how to prepare and present winning and winsome arguments Because of its emphasis on winning the books pedagogy blends law linguistics logic psychology rhetoric and semantics

Intellectual Assurance Brett Coppenger,Michael Bergmann,2016-02-26 This volume presents a dozen essays by prominent contemporary epistemologists providing a careful examination and critical evaluation of traditional epistemic internalism Unlike competing versions of internalism the guiding principle of traditional internalism is not to accommodate our commonsense nonskeptical views about the rationality of our ordinary beliefs but to emphasize the need for strong skepticism resistant intellectual assurance that our ordinary beliefs perceptual and otherwise are true The essays focus on what traditional internalism has to say about the following three topics the nature of non inferentially justified belief the nature of inferentially justified belief and the best way to respond to skepticism The end product is a volume containing many probing objections to traditional internalism pushing its proponents to provide creative new defenses if they want this old fashioned view to survive in the modern world
