Bioprocess Technology Anton Moser, 2012-12-06 This book is based on a 1981 German language edition published by Springer Verlag Vienna under the title Bioprozesstechnik Philip Manor has done the translation for which I am deeply grateful This book differs from the German edition in many ways besides language It is substantially enlarged and updated and examples of computer simulations have been added together with other appendices to make the work both more comprehensive and more practical This book is the result of over 15 years of experience in teaching and research It stems

from lectures that I began in 1970 at the Technical University of Graz Austria and continued at the University of Western Ontario in London Canada 1980 at the Free University of Brussels 1981 at Chalmers Technical University in G6teborg Sweden at the Academy of Sciences in Iena East Germany at the Haus der Technik in Essen West Germany 1982 at the Academy of Science in Sofia Bulgaria and at the Technical University of Delft Netherlands 1986 The main goals of this book are first to bridge the gap that always exists between basic principles and applied engineering practice second to enhance the integration between biological and physical phenomena and third to contribute to the internal development of the field of biotechnology by describing the process oriented field of bioprocess technology
