Biology of the Mouse Histocompatibility-2 Complex J. de Klein, 2012-12-06 Somewhere I heard a story of a bridge and a painter The bridge was enormous and was made all of metal and the painter's job was to keep it from rusting He would start at one end and slowly proceed day by day month by month toward the other end painting the bridge But no sooner would he finish with the painting than the bridge would begin to rust again The rust too would start at one end and slowly proceed toward the other end systematically destroying the painter's endeavor And so the painter would return to where he had started and begin painting again slowly proceeding toward the other end of the bridge always just one step ahead of the rust And if the story is true the painter might still be painting that bridge a modern Sisyphus During the writing of this book the story of the painter and his bridge kept coming to mind The field the book covers has been developing so rapidly that like the painter I too had to return to where I had started and fight the rust of obsolescence But unlike the painter I had a deadline to meet which constituted a point of no return And so sending off this manuscript I have no choice but to watch the fruits of my endeavor be overtaken by the rust *Biological Problems of Grafting* Peter Brian Medawar, Université de Liège. Bone Implant Grafting John Older, 2012-12-06 Surgeons differ in their enthusiasm for autografts allografts and metallic implants nevertheless all have their place in orthopedic surgery For some defects in the skeleton bone grafting may be the only solution The pros and cons of bone grafting are thoroughly discussed by eighteen distinguished authorities in this book Their exchange of views and experiences reflects the diversity of thinking worldwide and points to exciting possibilities for future improvements The twenty eight chapters describe the natural history and immunology of auto and allografting innovative surgical techniques together with results whether successful or not and bone banking and its related problems especially HIV **Cellular Aspects of Immunity** G. E. W. Wolstenholme, Maeve O'Connor, 2009-09-16 The Novartis

Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world

Transplantation Johann W. Masshoff, 2012-12-06 Organ transplantation has almost disappeared from headlines in the daily press possibly because it failed to fulfill exaggerated expectations Transplantation pathology has become more and more important not only with relation to therapeutic transplantations but even more in its fundamental theories There is some analogy here to the development in space science where spectacular achievements were followed by sobering frustrations and where for the time being the effect on technology is more fruitful than the outcome of the original far reaching projects That transplant rejection was defined in most of its stages as an immunologic process has given many new impulses to immunology in general Transplantation assays have become a pet experiment in immunobiology and an abundant source of general information and knowledge The implications of such a development could not be predicted when the present volume was outlined and planned In accordance with the concept of WILLI MASSHOFF general transplantation pathology was given a central position as a fundamental science while the chapters on the transplantation of various tissues are of a more paradigmatic character It was MASSHOFF who invited competent authors and who managed to balance their articles despite some overlapping so as to draw a comprehensive picture of contemporary transplantation pathology WILLI MASSHOFF died while he was editing the first manuscripts As co editors we have undertaken to complete the publication that we began together
