## **Dutch Telecommunications Law:**

Dutch Telecommunications Law Peter Eijsvoogel, H. J. de Ru, 2000 The Dutch telecommunications market is probably one of the most open in the world Three years after its full liberalisation which was completed six months ahead of the EU timetable the Netherlands have approximately 65 operators with interconnection or special network agreements including five providers of mobile telephony networks Nearly all of the world's largest international players have established a presence in the Dutch telecom market It is for their benefit and for the benefit of their advisers that this book has been published Dutch Telecommunications Law contains the full text of the Dutch Telecommunications Act and of the most important decrees adopted thereunder concurrently in Dutch and in the English language In addition it contains a practical introduction to the telecommunications laws of the Netherlands described by leading practitioners in the field The Law of International Telecommunications in the Netherlands Wouter Hins, P. B. Hugenholtz, 1988 Telecommunications Regulation in the Netherlands Peter V. Eijsvoogel, 1997-01-01 As in the rest of the world the telecommunications industry in the Netherlands has been subject to drastic change over the last few years By necessity the same applies to its regulation the present Dutch Telecommunications Act dates from 1988 when competitive provision of infrastructure and services was almost non-existent Since then technological developments and a general tendency towards liberalisation have had a profound impact on the market structure on 15 July 1996 a major amendment to the Dutch Telecommunications Act introduced virtually unlimited competition in the provision of fixed telecommunication infrastructure In addition almost all telecommunication services with the exception of public voice telephony were liberalised This book provides an introduction to Dutch telecommunications regulation and contains English translations of the Telecommunications Act the Fixed Telecommunications Infrastructure Licenses Act and a number of important regulations implementing the acts This publication results from a cooperative effort between the law firm Loeff Claey's Verbeke and the Telecommunications and Post Department of the Ministry of Transport Public Works and Water Management **Cyber Law in the Netherlands** Arno R. *Experimentalist Competition Law and the Regulation of Markets* Yane Svetiev,2020-11-26 This book charts the emergence of experimentalist governance in the implementation of EU competition law as a response to uncertainty and the limits of hierarchical enforcement in an increasingly dynamic and heterogeneous economic environment It contributes to ongoing debates about the current state of EU competition law and provides an innovative account of emergent enforcement trends and its future direction It also argues that an experimentalist evolution of competition law and market regulation attenuates concerns about the competitive strictures of EU law on national economic and regulatory institutions Through its focus on experimentalist governance the book provides guidance on completing experimentalist infrastructures for market regulation as well as on the role of courts in triggering and sustaining experimentalist solutions As such it offers a novel perspective on implementing competition law in the EU and beyond
