**Cell-based Biosensors** Ping Wang,Qingjun Liu,2010 Written by recognized experts the field this leading edge resource is the first book to systematically introduce the concept technology and development of cell based biosensors You find details on the latest cell based biosensor models and novel micro structure biosensor techniques Taking an interdisciplinary approach this unique volume presents the latest innovative applications of cell based biosensors in a variety of biomedical fields The book also explores future trends of cell based biosensors including integrated chips nanotechnology and microfluidics Over 140 illustrations help clarify key topics throughout the book

*Semiconductor Sensors* S. M. Sze,1994-10-28 Semiconductor Sensors provides complete coverage of all important aspects of all modern semiconductor sensing devices It is the only book that offers detailed coverage of the fabrication characterization and operational principles of the entire spectrum of devices made from silicon and other semiconductors and it is written by world renowned experts in the sensor field This authoritative guide combines user friendly organization for quick reference with a masterful pedagogical design that helps build the reader s understanding from section to section and from one chapter to the next It begins with a discussion of semiconductor sensor classification and terminology and moves on to a broad description of semiconductor technology emphasizing bulk and surface micromachining Senior undergraduate and first year graduate students will appreciate the 300 illustrations and tables that help to clarify difficult points and encourage visualization of the devices under discussion They will also benefit from the interdisciplinary nature of the presentation which encompasses applied physics chemical engineering electrical and mechanical engineering and materials science For engineers and scientists involved in sensor research and development or in designing sensor dependent devices and systems Semiconductor Sensors is the ultimate one stop source for the latest information on existing technologies

**Diagnostic Biosensor Polymers** Arthur M. Usmani,American Chemical Society. Meeting,1994 Reviews the latest advances in redox conductive polymers and membranes Describes new redox polymers useful in miniaturizing biosensors and examines polymers for optical biosensors Investigates interesting membranes to enhance the performance of biosensors Features biocompatible polymers useful in implantable sensors Includes discussions on enzyme immobilization and methods to increase enzyme stability Describes the chemistry and technology of dry chemistries
