Birch Interval:

Bones, Boats, and Bison E. James Dixon, 1999 This revolutionary synthesis dispels the stereotype of big game hunters following mammoths across the Bering Land Bridge while painting a vivid picture of marine mammal hunters fishers and general foragers colonizing the New World

American Beginnings Frederick Hadleigh West, Constance F. West, 1996-12 During the last Ice Age a thousand mile wide land bridge connected Siberia and Alaska creating the region known as Beringia Over twelve thousand years ago a procession of large mammals and the humans who hunted them crossed this bridge to America Much of the Russian evidence for this migration has until now remained largely inaccessible to American scholars American Beginnings brings together for the first time in one volume the most up to date archaeological and palaeoecological evidence on Beringia from both Russia and America An invaluable resource It will no doubt remain the key reference book for Beringia for many years to come Steven Mithen *Journal of Human Evolution* Extraordinary The fifty six contributors represent the most prominent American and Russian researchers in the region Choice Publication of this well illustrated compendium is a great service to early American and especially Siberian Upper Paleolithic archaeology Nicholas Saunders *New Scientist* This is a great book perhaps the greatest contribution to the archaeology of Beringia that has yet been published This is the kind of book to which archaeology should aspire Herbert D G Maschner *Antiquity* *New York Magazine* , 1976-05-10 *New York Magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea

Paleoecology of Beringia David M. Hopkins, John V. Matthews, Charles E. Schweger, 2013-09-17 Paleoecology of Beringia is the product of a symposium organized by its editors sponsored by the Wenner Gren Foundation for Anthropological Research and held at the foundation s conference center in Burg Wartenstein Austria 8-17 June 1979 The focus of this volume is on the paradox central to all studies of the unglaciated Arctic during the last Ice Age that vertebrate fossils indicate that from 45 000 to 11 000 years BP an environment considerably more diverse and productive than the present one existed whereas the botanical record where it is not silent supports a far more conservative appraisal of the region s ability to sustain any but the sparsest forms of plant and animal life The volume is organized into seven parts Part 1 focuses on the paleogeography of the Beringia The studies in Part 2 explore the ancient vegetation Part 3 deals with the steppe tundra concept and its application in Beringia Part 4 examines the paleoclimate while Part 5 is devoted to the biology of surviving relatives of the Pleistocene ungulates Part 6 takes up the presence of man in ancient Beringia Part 7 assesses the paleoecology of Beringia during the last 40 000 years
