Absence And Negativity:

Dialectic and Difference Alan Norrie,2009-12-04 Dialectic and Difference is the first systematic exploration of Roy Bhaskar s dialectical philosophy and its implications for ethics and justice That philosophy has three aims a dialecticisation of original critical realism a critical realisation of dialectic and a metacritique of western philosophy In the first real absence or negativity links structured being to dialectical becoming in a dynamic world The second draws on Marx to locate the critical impulse in Hegel s dialectic in a material open and changing totality The third identifies a central problem in western philosophy from the Greeks on the failure to think real negativity as the essence of change ontological monovalence Bhaskar s ethics connect basic human ontology with universal principles of freedom and solidarity He marries constellates these with a grasp of how principles are historically shaped His account of freedom moves from the infant s primal scream to the eudaimonic society but thinks the limits to freedom under modern conditions The morally real in ethics and justice is displaced and reconfigured as relations between the ideal and the actual Western philosophy systematically denies the real negativity that drives Bhaskar s dialectic Metacritique traces this to Parmenides and Plato s account of non being as difference It enables a critique of the poststructural radicalisation of difference via Nietzsche and the doctrine of Heraclitan flux Mobilised as the other of Plato s Forms this remains a move on Platonic terrain It too denies real negativity in structured being as the ground of historical change and moral praxis This text is essential reading for all serious students of social theory philosophy and legal theory

Dictionary of Critical Realism Mervyn Hartwig,2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

This Sorrowful Song David Scott,2025-09-10 This Sorrowful Song A Genealogy and Ethics of Critical Realism addresses the concept and practice of critical realism through a semiotic and ethical lens In trying to understand how a concept or a set of concepts functions in the world it is important to contextualise the way it functions within three networks or constellations of meaning antecedent

frameworks coextensive frameworks and pragmatic frameworks This book is constructed around these three frameworks as any text about an idea ethics or a conceptual tradition a critical realist genealogy should be It traces the genealogy of the term critical realism through the work of Roy Sellars Ludwig Wittgenstein Wilfred Sellars Richard Rorty Roy Bhaskar and Robert Brandom It sets out a theory of critical realism its genealogical semantic ethical and pragmatic elements that pays due deference to these six seminal theorists contextualising this theory as a replacement and alternative to empiricism There is a dearth of monographs and introductory texts about the most important relation in social theory and meta philosophy that of world to mind and mind to world relations and connections the critical ethical and transformational apperceptive process
