Change of State First Phase Lavirrealista,2019-03-26 Much of humanity is building a hypertechnological society that is rapidly evolving into an advanced social structure People live in centres where applied science flourishes in a vibrant cooperative environment It is in the area of biosciences where the greatest developments have occurred giving rise to the impenetrable biobarriers living structures which protect the settlements and to real virtuality which allows total immersion into artificial worlds which are experienced in a way indistinguishable from reality The society is at its peak even though the ghosts of the past and the fear of the future always threaten any new way of life both from outside and within A fascinating journey through time and space in a world of robotics biotech simulations and virtuality

Armies of Empire Allan Converse,2011-04-07 Armies of Empire uniquely reflects upon the experience of two divisions from different armies facing similar challenges in the Second World War The 9th Australian Division and the British 50th Northumbrian Division both saw long service and suffered heavy casualties and both encountered morale discipline and battlefield effectiveness problems In this illuminating comparative study of Australian and British divisions at war Allan Converse draws extensively on primary sources as well as recent scholarship on morale and combat efficiency His fresh approach questions the popular mythology surrounding the Australian Digger and the British Tommy and shows how it was a combination of leadership loyalty and tactics rather than intrinsic national qualities which resulted in victory for Churchill's armies

Browned Off and Bloody-minded Alan Allport,2015-01-01 More than three and a half million men served in the British Army during the Second World War the vast majority of them civilians who had never expected to become soldiers and had little idea what military life with all its strange rituals discomforts and dangers was going to be like Alan Allport's rich and luminous social history examines the experience of the greatest and most terrible war in history from the perspective of these ordinary extraordinary men who were plucked from their peacetime families and workplaces and sent to fight for King and Country Allport chronicles the huge diversity of their wartime trajectories tracing how soldiers responded to and were shaped by their years with the British Army and how that army however reluctantly had to accommodate itself to them Touching on issues of class sex crime trauma and national identity through a colorful multitude of fresh individual

Montgomery and Colossal Cracks Stephen Hart,2000-05-30 A reinterpretation of the British Army s conduct in the crucial 1944 45 Northwest Europe campaign this work examines systematically the Colossal Cracks operational technique employed by Montgomery s Anglo Canadian 21st Army Group and demonstrates the key significance that morale and casualty concerns exerted on this technique To ensure a full understanding of the campaign one needs to look not only at Montgomery s methods but at those of his army commanders Dempsey and Crerar thus this study addresses the scant attention to date paid to these two figures Hart suggests that Montgomery and his two senior subordinates handled this formation more effectively than some scholars have suggested In fact Colossal Cracks the concentration of massive force at a point of German weakness represented the most appropriate weapon the 1944 British Army could develop under the circumstances Previous studies have been characterized by an overemphasis on Montgomery s role in the campaign rather than a systematic examination of overall British methods They have ignored the difficulties that the 1944 British Army faced given its manpower shortage and they have underestimated the appropriateness of Monty s methods to the campaign war aims that Britain pursued namely the desire that Britain s modest military forces secure a high profile within a larger Allied effort The cautious firepower laden approach used by the 21st Army Group was both crude and a double edged sword however despite these weaknesses Colossal Cracks represented an appropriate technique given the nature of British war aims and the relative capabilities of the forces involved It proved to be just enough to defeat the Germans and keep alive British hopes that her war aims might be achieved
