Translation Activity in Late Byzantine World Panagiotis Athanasopoulos,2022-09-06 During the late Byzantine period 1261-1453 a significant number of texts were translated from Latin but also from Arabic and other languages into Greek Most of them are still unedited or available in editions that do not meet the modern academic criteria Nowadays these translations are attracting scholarly attention as it is widely recognized that besides their philological importance per se they can shed light on the cultural interactions between late Byzantines and their neighbours or predecessors To address this desideratum this volume focuses on the cultural context the translators and the texts produced during the Palaeologan era extending as well till the end of 15th c in ex-Byzantine territories By shedding light on the translation activity of late Byzantine scholars this volume aims at revealing the cultural aspect of late Byzantine openness to its neighbours [The sources of theological knowledge.
