Postgraduate Diploma in Accounting (master's level) - City of London College of Economics - 12 months - 100% online / self-paced City of London College of Economics, Overview In this diploma course you will deal with all kinds of Financial Accounting and General Topics to become a successful Accountant at master s level Content Financial Accounting Regulations and Organizations The Framework of Financial Accounting Concepts and Standards Securities and Exchange Commission Reporting Requirements Introduction to Internal Control Assessment and Reporting Public Company Accounting Oversight Board Earnings Management Forgetting Our Duties to the Users of Financial Reports The Lesson of Enron Management Discussion and

Analysis Global Accounting and Auditing Financial Statements Form and Content Income Statement Presentation and Earnings per Share Accounting for Business Combinations Consolidation Translation and the Equity Method Statement of Cash Flows Interim Financial Statements Analyzing Financial Statements And much more Duration 12 months Assessment The assessment will take place on the basis of one assignment at the end of the course Tell us when you feel ready to take the exam and we ll send you the assignment questions Study material The study material will be provided in separate files by email download link [Federal Register](#) ,2004-03 [The European Union's Foreign Economic Policies](#) Andreas Dür,Manfred Elsig,2014-01-02 The European Union is a key actor in international economic governance Through its foreign economic policies it plays a central role in the negotiation of international trade agreements the global regulation of the financial services sector and the provision of aid to developing countries This book shows how principal agent theory can be used to shed new light on this complex of policy areas In particular the contributions to this volume analyze delegation control and agent strategies in a variety of principal agent relationships shaping the EU s foreign economic policies mainly those involving interest groups and governments governments and the European Commission and the European Union and international organizations The chapters written by leading experts in the field offer empirically rich studies of various areas of the EU s external economic relations including trade financial regulation accounting standards and global regulation through the G7 G8 The book is aimed at researchers and advanced students interested in the EU international economic relations and principal agent theory This book was published as a special issue of the Journal of European Public Policy

The European Union and Global Financial Regulation Lucia Quaglia,2014-06-26 The European Union and Global Financial Regulation examines the influence of the European Union EU in regulating global finance addressing several inter related questions Why does the EU upload international financial regulation in some cases download it in other cases and cross load either actively or passively in other instances Has this changed over time especially after the third stage of Economic and Monetary Union and the completion of the single financial market or after the global financial crisis Under what conditions is the EU more or less likely to upload download or cross load rules Through which mechanisms does this take place Overall does the EU act as a pace setter in regulating global finance or is it mainly a follower Why The key explanatory variable used in this research is the concept of regulatory capacity applied to the EU and the US distinguishing between strong and weak regulatory capacity The influence of the EU in global financial regulation depends on the combinations of EU and US regulatory capacities When EU regulatory capacity is weak and US regulatory capacity is strong the US will mainly upload its domestic rules internationally and or actively cross load them to the EU whereas the EU will mainly download international rules When the EU regulatory capacity is strong and US regulatory capacity is weak the EU is able to upload its rules internationally and or actively cross load them to third countries When the EU and the US regulatory capacities are weak private sector governance prevails When the EU and US regulatory capacities are strong both

jurisdictions seek to upload and cross load their domestic rules International Pressures for Accounting Change Anthony G. Hopwood,1989 *International Financial Sector Reform:Standard Setting and Infrastructure Development* Douglas Arner,S. H. Goo,Zhongfei Zhou,2002-06-26 In the wake of the Asian financial crisis that erupted in 1997 an intense scrutiny of the principles and standards of the world s financial system was inevitable This new book a major milestone in the progressive development of the new financial architecture arising from the debacle represents the penetrating insight and practical proposals of twenty five experts including economists lawyers bankers academics and officials from international financial institutions The important contributions offered here were originally presented at a series of conferences sponsored in 1999 and 2000 by the Asian Institute of International Financial Law of the University of Hong Kong in collaboration with leading law faculties from five continents The issues boldly confronted in *International Financial Sector Reform* include the following reform of domestic securities regulation investment insurance and risk management the role of pension funds accounting standards financing real estate and construction projects global competitiveness in the financial sector responsibility of private lenders effective anti money laundering measures and protection of emerging market economies
