Acceleration Of History:

The Acceleration of History Gerard Piel,1972 Demolishing the contemporary folklore of the laboratory of the machine and of economics Gerard Piel asserts the responsibility of each citizen for the uses to which society puts the enormous forces now at its command The values of science show the dilemmas of technology to be political issues demanding urgent rational action Science and technology extend the dignity of citizenship to all members of society institutions created for the inequitable distribution of scarcity must yield to measures for equitable sharing of abundance The obligations of citizenship he declares are laid the more squarely upon each individual by what he must inescapably learn from science about the world and his place in it From book jacket

Geotechnical Earthquake Engineering Ikuo Towhata,2008-12-19 This book is a product of my long term activities in both education and research Its publication was made possible by a financial support supplied by the Ministry of Education Culture Sports Science and Technology As for education I was told for the first time in 1985 to teach soil dynamics in Asian Institute of Technology in Bangkok Thailand I collected experimental and field findings from many publications and made a small series of handouts Since computer technologies were not well advanced in mid 80s the handouts were products of cut and paste in the physical sense Many pages were even handwritten Afterwards I started to teach the same subject in 1995 at University of Tokyo Since then I have added more information from field investigation and laboratory tests as well as analyses It has become possible to put all in an electronic media that makes teaching easier Readers can find that this book includes Japanese writing among English text This is because I use this text for teaching in Tokyo The main aim of this book is a collection of data which is useful in understanding the state of art technology and its application to new topics Understanding the fundamental issues is important because practice makes use of many assumptions hypotheses and way of thinking It has been my policy to show reasons why practice employs those ideas by showing experimental and field backgrounds This idea does not change even today
