Achieving Proficiency in Mathematics Mathew M. Mandery, Marvin Schneider, 2000-06-01 To help students achieve mathematical mastery from the minimum competency level to the proficiency level *Mathematical Proficiency for All Students: Toward a Strategic Research and Development Program in Mathematics Education* Deborah Loewenberg, 2003-04-15 A clear need exists for substantial improvement in mathematics proficiency in U S schools The RAND Mathematics Study Panel was convened to inform the U S Department of Education s Office of Educational Research and Improvement on ways to improve the quality and usability of education research and development R teaching and learning of skills needed for mathematical thinking and problem solving and teaching and learning of algebra from kindergarten through the 12th grade Basic Education Beyond the Millennium Development Goals in Ghana Peter Darvas, David Balwanz, 2013-12-11 Inequity is the central challenge facing basic education in Ghana and undercuts the potential contribution of basic education to Ghana s national development goals Persistent disparities in education service delivery and inequitable allocation of resources in Ghana lead to highly inequitable educational outcomes These inequities negatively affect system quality efficiency and accountability and ultimately undermine broader national development Wide spread inequity in education service delivery significantly depresses system learning outcomes This report describes a missing middle in terms of learning outcomes While a small number of children perform well the majority of pupils more than 60% pass through primary school without becoming proficient in numeracy and literacy Specifically children from Ghana s northern regions and deprived districts poor and rural households and ethnic and linguistic minorities students who require the most support to meet learning outcomes receive on average disproportionately fewer resources from the government than their peers Systemic inequities create this missing middle and drag down system performance Following a decade of rapid change as of 2013 more children are attending basic and senior high schools than at any time in the history of Ghana In the past decade Ghana has realized great growth progress and change Population growth urbanization and significant GDP growth have changed the economic political and social landscape of Ghana In the past decade incidence of extreme poverty has been cut in half Introduction of Free Compulsory Universal Basic Education FCUBE and kindergarten has supported a near doubling of basic education enrollment in the past 15 years Delivering basic education and ensuring equity has become more challenging Compared to a decade ago more stakeholders are involved in allocating and managing core education inputs and accountability systems remain unclear and weak Addressing the deeply embedded inequities e g allocation of trained teachers support to deprived districts and populations is further complicated by a complex and fragmented policy management and financing environment The persistence of inequity reflects the persistence of conflicting sector interests and poses genuine policy dilemmas However recent experience shows that accelerating progress toward equity and quality basic education for all is possible Several recent initiatives in Ghana point to the possibility of improving equitable resource

allocation strengthening social protection and providing additional support to improve learning outcomes For example children with below average learning outcomes in poorly resourced environments are likely to show measurable gains when provided additional support e g instructional support learning resources management support demand side incentives
