Festivals in Classical China: New Year and Other Annual Observances During the Han Dynasty, 206 B.C.-A.D. 220 Derk Bodde, 1975 **Ancient China** John S. Major, Constance A. Cook, 2016-09-22 Ancient China A History surveys the East Asian Heartland Region the geographical area that eventually became known as China from the Neolithic period through the Bronze Age to the early imperial era of Qin and Han up to the threshold of the medieval period in the third century CE For most of that long span of time there was no such place as China the vast and varied territory of the Heartland Region was home to many diverse cultures that only slowly coalesced culturally linguistically and politically to form the first recognizably Chinese empires The field of Early China Studies is being revolutionized in our time by a wealth of archaeologically recovered texts and artefacts Major and Cook draw on this exciting new evidence and a rich harvest of contemporary scholarship to present a leading edge account of ancient China and its antecedents With handy pedagogical features such as maps and illustrations as well as an extensive list of recommendations for further reading Ancient China A History is an important resource for undergraduate and postgraduate courses on Chinese History and those studying Chinese Culture and Society more generally **The Family in Classical China** Hiram Parkes Wilkinson, 1926

Language in the Buddhist Tantra of Japan Richard K. Payne, 2018-08-09 Language in the Buddhist Tantra of Japan dismantles the preconception that Buddhism is a religion of mystical silence arguing that language is in fact central to the Buddhist tradition By examining the use of extraordinary language evocations calling on the power of the Buddha in Japanese Buddhist Tantra Richard K Payne shows that such language was not simply cultural baggage carried by Buddhist practitioners from South to East Asia Rather such language was a key element in the propagation of new forms of belief and practice In contrast to Western approaches to the philosophy of language which are grounded in viewing language as a form of communication this book argues that it is the Indian and East Asian philosophies of language that shed light on the use of language in meditative and ritual practices in Japan It also illuminates why language was conceived as an effective means of progress on the path from delusion to awakening **The Architectural Art of Ancient China** Qingxi Lou, 2002 **China**, 1924 **The Story of the World** Susan Wise Bauer, 2004-05-31 Presents a history of the ancient world from 6000 B C to 400 A D **Pattern and Person** Martin J. Powers, 2020-03-17 In Classical China crafted artifacts offered a material substrate for abstract thought as graphic paradigms for social relationships Focusing on the fifth to second centuries B C Martin Powers explores how these paradigms continued to inform social thought long after the material substrate had been abandoned In this detailed study the author makes the claim that artifacts are never neutral as a distinctive possession each object through the abstracting function of style offers a material template for scales of value Likewise through style pictorial forms can make claims about material referents the things depicted By manipulating these scales and their referents artifacts can shape the way status social role or identity is understood and enforced The result is a kind of spatial epistemology within

which the identities of persons are constructed Powers thereby posits a relationship between art and society that operates at a level deeper than iconography attributes or social institutions Historically Pattern and Person traces the evolution of personhood in China from a condition of hereditary status to one of achieved social role and greater personal choice This latter development essential for bureaucratic organization and individual achievement challenges the conventional opposition between Western individuals and collective Asians
