Classical Loopinloop Chains Jewelry Crafts:

Classical Loop-in-Loop Chains J.R. Smith,2013-04-18 This is not only a book of instruction in chainmaking but it is also a work celebrating man's continuous creativity over thousands of years. At times something that man creates has far reaching effects an example that quickly comes to mind is the wheel which has enabled many developments from pottery to computers. At this point it is important to note that these same wheels could not have been made without metal tools. From early Neolithic times on gold was a favorite choice in the making of jewelry. During the Neolithic period these shining stones probably alluvial were prized. Actually gold was cold worked as if it were a stone. There is a surviving example of cold worked gold from Catalhuyuk present day Turkey estimated to have been made in 6500 B.C. There were only four metals on the earth's surface that were found in sufficient quantity to be used gold copper silver and meteoric iron. An understanding of the malleability of gold and of the annealing effect of fire changed jewelry making new forms were found. Gold was no longer a piece of stone but a material that could be flattened and made very thin. Sheet and foil are the oldest forms of worked gold. The smiths tools were stone wood and horn. *Classical Loop-in-Loop Chains and Their Derivatives* Jean Reist Stark,Josephine Reist Smith,Stark,2003 Clear step by step instructions will lead you through a total of 38 chain styles all derived from the elegant loop in loop process. The many uncertainties about the Treasure include its place of origin whether all the objects are from the same findspot whether it should be considered as a homogenous group. Through examination of stylistic elements and comparison with objects from other collections the contributors to this volume variously argue for the Treasure's possible Minoan Mycenaean Near Eastern and Egyptian connections. Major discoveries in the field have been made since Reynold Higgins 1979 publication on the Treasure including the excavation of a warrior shaft grave in Aigina in 1981. The essays are complemented by a complete catalogue of the Treasure which incorporates the results of an extensive technological examination and is accompanied by specially taken beautiful colour photographs [The Grove Encyclopedia of Classical Art and Architecture](#) Gordon Campbell,2007 [The Grove Encyclopedia of Classical Art and](#)
