EBOOK: A-Z of Teaching Jonathan Savage, Martin Fautley, 2013-07-16 A Z of Teaching provides an informative engaging and accessible introduction to the art and craft of teaching introducing you to a range of essential topics alongside some of the key ideas and key thinkers from the educational research literature The topics covered range from practical teaching advice on areas such as questioning to exploration of significant themes within education such as creativity Each entry includes An introduction to the topic with a definition of the term An exploration of key ideas within the topic Reference to the work of key thinkers who have explored the topic in the educational literature How these ideas apply in your day to day practice of teaching and learning A set of questions for you to consider as you seek to develop your pedagogy in a particular topic area Further reading and references including links to relevant writings in other publications or online sources Teaching is a broad and complex activity so whether you are thinking about becoming a teacher training to be a teacher or a qualified teacher wishing to keep abreast of the latest thinking in the field the ideas contained in this book will prove helpful and constructive as you seek to develop your teaching skills Every so often a new idea unfolds that seems so deceptively simple that one wonders why it hasn t appeared before now this is the case with A Z of Teaching Serving as a high definition map of classroom teaching it provides mentorship for survival and thriving in the profession Comprehensive without being laboured rich in concepts without succumbing to clutter ingeniously economic in the identification of key themes without being trifling Savage and Fautley manage to distil the important and inspiring from vast amounts of theory research and practical experience of teaching and present the essential elements in a most accessible manner for early career teachers More experienced educators will also find many gems to renew and inspire their practice The approach is pragmatic whilst never seeking to trivialise the challenges of teaching or the vast amounts of extant theories Most importantly the reflective questions at the end of each section serve to provoke further thinking research and action thus

contributing meaningfully to the development of effective and reflective teachers for contemporary schools Regina Murphy PhD Senior Lecturer St Patrick's College Dublin City University Ireland The construction of this book is very satisfying it is so straightforward to access and simultaneously works at so many levels Using the tried and tested structure of an A to Z listing Jonathan Savage and Martin Fautley consider a number of highly significant aspects of education pedagogy and professional issues for teachers at all stages of their professional development In their consideration of some 103 topics they skilfully blend key theoretical underpinning with current practice in the classroom making this book extremely useable by teachers in all sectors and age phases The range of topics makes this especially useful because it covers some big issues but also explores some less frequently covered things such as audience and elicitation What I have found particularly helpful is the fact that in this book I readily recognise aspects of my own classroom practice in the overview of each topic but I am encouraged and inspired to reflect more deeply on my professional development in the light of the collected wisdom and challenging questions This book will be an invaluable tool for training and beginning teachers as well as for those with years of experience The inclusion of key questions and further reading means that it can serve as a very accessible reference book an aide memoir or as a stimulus for more detailed debate discussion or professional development Consequently it will support the work of individuals department or phase teams or even larger groups The potential to individualise training and coaching by referring trainees to relevant entries is great I will certainly want to use it when working with trainee teachers and also with teachers undertaking CPD and Masters qualifications I look forward to Volume 2 appearing in the future Simon Spencer Birmingham City University UK I am delighted to welcome this brief but important compendium of the A Z of Teaching written by Jonathan Savage and Martin Fautley authors with extensive experience of teaching This book provides eloquent insights and distilled definitions of key terms and concepts in an introductory way that will inform inspire engage and help navigate through the maze of key terms which busy students in initial teacher education and practising teachers simply must read Pamela Burnard Faculty of Education University of Cambridge UK This is a very entertaining and well structured resource written in easy and accessible language It contains a serious carefully referenced introduction to a number of major issues encountered in the early stages of learning to teach It will be equally useful for beginners or experienced teachers and mentors as it gives practical guidance about some of the areas for discussion coaching and assistance which commonly arise when learning to teach Professor Janet Hoskyns Head of School Education Birmingham City University UK

about teaching that covers a broad range of content without being superficial

Teaching English in Africa Anderson, Jason, 2016-04-30 Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent This book relates the practice of English language teaching directly to the African context As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa both at primary and secondary level It is intended to be a practical guide so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa If there is a bias in this book it is towards the needs of teachers working in low resource isolated contexts in Africa as these teachers are so often neglected by literature on teaching methodology
