The American and Japanese Auto Industries in Transition Robert Cole, Taizo Yakushiji, 2020-08-06 This report was prepared for the Policy Board by the U S and Japanese research staffs of the Joint U S Japan Automotive Study under the general direction of Professors Paul W McCracken and Keichi Oshima with research operations organized and coordinated by Robert E Cole on the U S side in close communication with the Taizo Yakushiji on the Japanese side

preface In view of the importance of stable long term economic relationships between Japan and the United States automotive issues have to be dealt with in ways consistent with the joint prosperity of both countries Furthermore the current economic friction has the potential to adversely affect future political relationships Indeed under conditions of economic stagnation major economic issues inevitably become political issues With these considerations in mind the Joint U S Japan Automotive Study project was started in September 1981 to determine the conditions that will allow for the prosperous coexistence of the respective automobile industries During this two year study we have identified four driving forces that will play a major role in determining the future course of the automotive industry of both countries These are 1 consumers demands and aspirations vis vis automobiles 2 flexible manufacturing systems FMS 3 rapidly evolving technology and 4 the internationalization of the automotive industry
