## **Common Knowledge The Development Of Understanding In The Classroom:**

**Common Knowledge** Derek Edwards, Neil Mercer, 2013-12-17 This book is about education as a communicative process about how knowledge is presented received controlled understood and misunderstood by teachers and children in the classroom

**Common Knowledge** Derek Edwards, 1987 [Common Knowledge ; the Development of Understanding in the Classroom, By Derek Edwards and Neil Mercer](#) Derek Edwards, 1987

**Language and the Joint Creation of Knowledge** Neil Mercer, 2019-04-25 In the World Library of Educationalists series international experts themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Language and the Joint Creation of Knowledge draws on the most prominent writing of Neil Mercer covering his ground breaking and critically acclaimed work on the role of talk in education and on the relationship between spoken language and cognition The text explores key themes relating theoretical ideas to research evidence and to practical educational situations that improve children s lives Offering students and researchers a clear accessible and up to date account of a sociocultural perspective on the relationship between spoken language and cognition it explains one of the key themes in Neil Mercer s work that humans have uniquely evolved the capacity to think together or interthink Offering a crucial insight into the work of Neil Mercer this selection showcases why his approach has become the dominant paradigm in educational research and why it is increasingly influential in the psychology of teaching and learning This unique collection of published articles and chapters which represent the key themes and range of his research over the last 40 years will be of interest to all followers of his work and any reader interested in the role of language in education

**The Guided Construction of Knowledge** Neil Mercer, 1995-01-01 Through analyzing talk which goes on in primary school classrooms and some other locations this text explains the process of teaching and learning as a social communicative activity It contains transcribed episodes of speech between learners and teachers and learners The concepts described should be useful for teachers concerned with the quality of education in their classrooms

**Doing Educational Research** Geoffrey Walford, 2002-11 Thirteen major educationalists offer semi autobiographical accounts of their own influential research work focusing on the practical and personal realities of the research process Authors such as Barbara Tizard and Martin Hughes Stephen J Ball David Reynolds and Peter Mortimore discuss their approaches to aspects of research from conception and funding of the project to information gathering and analysis writing up and publishing

[Cultural-Historical Approaches to Studying Learning and Development](#) Anne Edwards, Marilyn Fleer, Louise Bøttcher, 2019-04-02 This collection of papers examines key ideas in cultural historical approaches to children s learning and development and the cultural and institutional conditions in which they occur The collection is given coherence by a focus on the intellectual contributions made by Professor Mariane

Hedegaard to understandings of children's learning through the prism of the interplay of society, institution, and person. She has significantly shaped the field through her scholarly consideration of foundational concepts and her creative attention to the fields of activity she studies. The book brings together examples of how these concepts have been employed and developed in a study of learning and development. The collection allows the contributing scholars to reveal their reactions to Hedegaard's contributions in discussions of their own work in the field of children's learning and the conditions in which it occurs.

**Dialogue and the Development of Children's Thinking** Neil Mercer, Karen Littleton, 2007-06-22 This book draws on extensive research to provide a groundbreaking new account of the relationship between dialogue and children's learning development. It closely relates the research findings to real-life classrooms so that it is of practical value to teachers and students concerned that their children are offered the best possible learning opportunities. The authors provide a clear, accessible, and well-illustrated case for the importance of dialogue in children's intellectual development and support this with a new and more educationally relevant version of socio-cultural theory which explains the fascinating relationship between dialogues and learning. In educational terms, a sociocultural theory that relates social, cultural, and historical processes, interpersonal communication, and applied linguistics is an ideal way of explaining how school experience helps children learn and develop. By using evidence of how the collective construction of knowledge is achieved and how engagement in dialogues shapes children's educational progress and intellectual development, the authors provide a text which is essential for educational researchers, postgraduate students of education, and teachers, and is also of interest to many psychologists and applied linguists.
