Clabical Nature:

Samuel Johnson's "general Nature" Scott D. Evans,1999-12 This study illuminates the importance and meaning of the term author in eighteenth century discourse from the perspective of its prominent usage by Samuel Johnson It explains Johnson s employment of nature in his periodical essays his qualified endorsement of the new science and his commendation of Shakespeare s drama and other literary works on the basis of their just representation of general nature **Nature's Ideological Landscape** Kenneth Olwig,2021-09-23 Originally published in 1984 Nature s Ideological Language examines the common ideological roots of environmental reclamation and nature preservation In the general context of European British and American historical experience the Jutland heaths of Denmark are taken as a concrete example for a general critique of European and American policy concerning the use of landscape Two sets of contradictions are highlighted ideological and practical between development and preservation and those between scientific historical aesthetic and recreational motivation for preservation The book is based on a study of the Jutland heath from 1750 to the present focusing on the Danish perception of the area as expressed in literary art and in economic journals topographies and government reports Against this background the development of the modern conception of nature is traced and its ideological implications and planning consequences discussed As a study of humanistic geography this book will be of interest to geographers conservationists and planners *Nature Study and the Child* Charles B. Scott,1901 *The Limits of Optimism* Maurizio Valsania,2011-08-03 The Limits of Optimism works to dispel persistent notions about Jefferson s allegedly paradoxical and sphinx like quality Maurizio Valsania shows that Jefferson s multifaceted character and personality are to a large extent the logical outcome of an anti metaphysical enlightened and humility oriented approach to reality That Jefferson s mind and priorities changed over time and in response to changing circumstances indicates neither incoherence hypocrisy nor pathology Valsania s reading of Jefferson the Enlightenment and negativity helps to make sense of the many paradoxes typically associated with that eighteenth century thinker At the same time it provides a corrective to the common though erroneous equation of Enlightenment thinking with rationalism and shallow optimism **Nature** Sir Norman Lockyer,1919 **The Nature of the Physical World** Sir Arthur Stanley Eddington,1928 *The Classical Weekly* ,1911 **East & West** ,1900 **Hartzenbusch and the Romantic Movement** Flora Jackman Howerton,1925 *Selections from the Poems of Thomas Gray* Thomas Gray,1898 *The Classic and the Beautiful from the Literature of Three Thousand Years* Henry Coppée,1894 **The Classic and the Beautiful from the Literature of Three Thousand Years** Henry Coppè,1898 *Poetry, its origin, nature, and history.
