**Clairvoyance in Space** C. W. Leadbeater, 2005-12 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world's literature in affordable high quality modern editions that are true to the original work Clairvoyance Various Authors, 2020-09-28 Clairvoyance means literally nothing more than clear seeing and it is a word which has been sorely misused and even degraded so far as to be employed to describe the trickery of a mountebank in a variety show Even in its more restricted sense it covers a wide range of phenomena differing so greatly in character that it is not easy to give a definition of the word which shall be at once succinct and accurate It has been called spiritual vision but no rendering could well be more misleading than that for in the vast majority of cases there is no faculty connected with it which has the slightest claim to be honoured by so lofty a name For the purpose of this treatise we may perhaps define it as the power to see what is hidden from ordinary physical sight It will be as well to premise that it is very frequently though by no means always accompanied by what is called clairaudience or the power to hear what would be inaudible to the ordinary physical ear and we will for the nonce take our title as covering this faculty also in order to avoid the clumsiness of perpetually using two long words where one will suffice Let me make two points clear before I begin First I am not writing for those who do not believe that there is such a thing as clairvoyance nor am I seeking to convince those who are in doubt about the matter In so small a work as this I have no space for that such people must study the many books containing lists of cases or make experiments for themselves along mesmeric lines I am addressing myself to the better instructed class who know that clairvoyance exists and are sufficiently interested in the subject to be glad of information as to its methods and possibilities and I would assure them that what I write is the result of much careful study and experiment and that though some of the powers which I shall have to describe may seem new and wonderful to them I mention no single one of which I have not myself seen examples Secondly though I shall endeavour to avoid technicalities as far as possible yet as I am writing in the main for students of Theosophy I shall feel myself at liberty sometimes to use for brevity's sake and without detailed explanation the ordinary Theosophical terms with which I may safely assume them to be familiar Should this little book fall into the hands of any to whom the occasional use of such terms constitutes a difficulty I can only apologize to them and refer them for these preliminary explanations to any elementary Theosophical work such as Mrs Besant's Ancient Wisdom or Man and His Bodies The truth is that the whole Theosophical system hangs together so closely and its various parts are so interdependent that to give a full explanation of every term used would necessitate an exhaustive treatise on Theosophy as a preface even to this short account of clairvoyance Before a detailed explanation of clairvoyance can usefully be attempted however it will be necessary for us to devote a little time to some preliminary considerations in order that we may have

clearly in mind a few broad facts as to the different planes on which clairvoyant vision may be exercised and the conditions which render its exercise possible We are constantly assured in Theosophical literature that all these higher faculties are presently to be the heritage of mankind in general that the capacity of clairvoyance for example lies latent in every one and that those in whom it already manifests itself are simply in that one particular a little in advance of the rest of us Now this statement is a true one and yet it seems quite vague and unreal to the majority of people simply because they regard such a faculty as something absolutely different from anything they have yet experienced and feel fairly confident that they themselves at any rate are not within measurable distance of its development It may help to dispel this sense of unreality if we try to understand that clairvoyance like so many other things in nature is mainly a question of vibrations and is in fact nothing but an extension of powers which we are all using every day of our lives We are living all the while surrounded by a vast sea of mingled air and ether the latter inter penetrating the former as it does all physical matter and it is chiefly by means of vibrations in that vast sea of matter that impressions reach us from the outside This much we all know but it may perhaps never have occurred to many of us that the number of these vibrations to which we are capable of responding is in reality quite infinitesimal Up among the exceedingly rapid vibrations which affect the ether there is a certain small section a very small section to which the retina of the human eye is capable of responding and these particular vibrations produce in us the sensation which we call light That is to say we are capable of seeing only those objects from which light of that particular kind can either issue or be reflected
