Taxing international business : emerging trends in APEC and OECD economies Asia Pacific Economic Cooperation|Organisation for Economic Co-operation and Development, 1997 Papers presented at a joint APEC OECD Symposium on International Business Taxation held on October 30 November 1 1996 and hosted by the Australian Treasury and the Australian Tax Office The development of a predictable and non discriminatory international tax framework is central to the goals of the OECD and APEC in encouraging cross border trade and investment This symposium promoted a better understanding of the relationship between trade investment and taxation issues and of the policy and administrative issues that arise in the taxation of multinational enterprises *Globalization and Standards* Keshab Das, 2014-09-29 The changes following more than two decades of economic reforms and globalization of the Indian economy at state corporate sector and consumer level raise interesting questions on the ways in which the stakeholders will continue to engage on the world stage politically socially and economically One key feature of global trade over this period has been the growing importance of not only product standards but importantly labor environmental food safety and social standards Being essentially a non tariff barrier standards have often become critical to market access and essential to sustained competitiveness This has a clear impact on the manner in which both global and Indian business is conducted now and in the future It also underlines the need for a new area of enquiry that addresses the following questions How are the Indian public and private actors the state domestic firms local consumers and society influencing and being influenced by such standards Do standards really matter in an overwhelmingly informal production sphere with consumers deeply segmented on the basis of a highly skewed distribution of income and with the rural population becoming further marginalized We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors both public and private How have they been able to drive these processes and what are their implications for larger concerns with inequalities and the conditions of the poor How does the omnipresent informality influence compliance encourage multiple standards and affect the chances of

addressing institutional dysfunctionality What role does regulation play These are some of the issues dealt with in the book which has chapters focusing on aspects of specific sectors such as microfinance pharmaceuticals automobiles tea trading the role of the state and changing consumer influence We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors both public and private How have they been able to drive these processes and what are the consequences of these changes for the Indian economy other emergent economies and for the rest of the developing world In particular what are their implications for the wider Indian society especially on concerns with informality inequalities and the conditions of the poor How does informality in its omnipresent form influence compliance encourage multiple standards and chances of addressing institutional dysfunctionality What role does regulation play These are some of the issues dealt within the book wherein chapters focus on aspects of specific sectors trading role of the state and changing influence of the consumer
