Apocalypse Not Science Economics And Environmentalism:

Apocalypse Not Ben W. Bolch, Harold Lyons, 1993 What is likely to kill off the human race first Overpopulation Global warming Ozone depletion Chemicals and insecticides Would you believe none of these Drawing on scientific evidence Ben Bolch and Harold Lyons an economist and a chemist show that the prophets of apocalyptic doom mislead and scare the public with their warnings of impending catastrophes *Apocalypse Not* debunks the alleged global threats to mankind as well as the scares about asbestos and radon It fosters respect for calm objective science while showing that the doomsday lobbyists exploit ignorance and cause hysteria Bolch and Lyons go on to show that contrary to the beliefs of some environmentalists modern society and the growth in population do not threaten our quality of life In fact science and industry have enabled more people to live longer healthier lives than ever before Resources are cheaper and more plentiful than anytime in history In light of those facts the authors take up the perplexing question of why the environmental movement with its apparent death wish has been able to persuade so many people that the human race is doomed Their answer to that question could help turn the tide that threatens to undo the industrial and scientific revolutions This book is the book that will restore good sense to thinking about the environment

Apocalypse Never (resumo) Michael Shellenberger, 2023-04-28 Este livro um resumo produzido a partir da obra original A mudança climática real mas não o fim do mundo Não aquecer nosso maior problema ambiental Michael Shellenberger tem lutado por um planeta mais verde por décadas Ajudou a salvar as últimas sequoias ameaçadas do mundo criou o que seria o predecessor do atual Novo Acordo Verde Green New Deal almeja juntamente com cientistas climáticos e ativistas liderar uma ação bem sucedida para manter as usinas nucleares funcionando assim evitando os famosos picos de emissão Por exemplo em 2019 enquanto se alegava que bilhões de pessoas iriam morrer o que contribuiu para uma ampla crise de ansiedade inclusive entre adolescentes como ativista ambiental há anos afamado especialista em energia e pai de uma adolescente Shellenberger resolveu que deveria falar mais a respeito a fim de separar a ficção da ciência Mesmo após anos de atenção dada pela grande mídia muitos continuam ignorantes quanto aos fatos mais básicos sobre clima Em boa parte das nações mais desenvolvidas os picos das emissões de carbono vêm caindo há mais de uma década O mesmo ocorre quanto aos números de mortes causadas por condições climáticas extremas que tiveram uma queda de 80% nos últimos quarenta anos inclusive em nações mais pobres Além disso o risco de um superaquecimento da Terra tem se tornado mais improvável graças ao baixo crescimento populacional e a abundância de gás natural Curiosamente aqueles que são mais alarmistas quanto aos problemas climáticos também são os que tendem a se opor às soluções mais viáveis O que está realmente por detrás de todo esse levante apocalíptico ambientalista Estão poderosos interesses financeiros Há desejo por status e poder E há sobretudo um desejo de transcendência de pessoas supostamente seculares O impulso espiritual pode ser natural e saudável por exemplo ao pregar medo sem amor e culpa sem redenção a nova religião não está satisfazendo nossas mais profundas necessidades psicológicas e existenciais
