Apology to Apostrophe James D. Fernández, 1992 Who writes I? To whom are autobiographies addressed? What kinds of readers are inscribed in autobiographical narratives? In *Apology to Apostrophe*, James D. Fernández offers a lucid and powerful meditation on the nature of autobiographical writing through his investigation of the historical conditions and literary stagings of autobiographical writing in Spain. As Fernández demonstrates, recent developments in critical theory provide new and fruitful approaches to autobiographical works that have long been neglected, misunderstood, or in some cases, virtually unknown. Focusing primarily but not exclusively on nineteenth-century Spain, Fernández exposes a rhetorical tension that often occurs in autobiographical discourse between self-justification or apology and the transcendence of this worldly impulse or apostrophe. This tension, he argues, is of particular interest in the case of Spain but not peculiar to that nation, and his attention to the theoretical nature of autobiography leads to insightful considerations of many canonical European autobiographies, including those of Saint Augustine, Rousseau, Saint Teresa, and Cardinal Newman. Considering

Spanish autobiography in the context of first person narrative in Europe and in the terms of current debates on the relationship between writing and selfhood Apology to Apostrophe marks a significant advance in our historical understanding and critical discussion of the genre The book will be of great value not only to Hispanists but also to those interested in autobiography and cultural history

Fictive Interaction Esther Pascual,2014-09-15 Language is intimately related to interaction The question arises Is the structure of interaction somehow mirrored in language structure and use This book suggests a positive answer to this question by examining the ubiquitous phenomenon of fictive interaction in which non genuine conversational turns appear in discourse even within clauses phrases and lexical items e g Not happy Money back guarantee The book is based on a collection of hundreds of examples of fictive interaction at all grammatical levels from a wide variety of spoken written and signed languages and from many different discourse genres Special attention is devoted to the strategic use of fictive interaction in legal argumentation with a focus on high profile criminal trials Both trial lawyers and lay jurors often present material evidence or murder victims as speaking and express emotions and intentions in conversational terms The book thus establishes the role of the conversational turn rather than the sentence as the basic unit of language and the role of conversation as a frame that structures cognition discourse and grammar
