**Representing the City** Anthony D. King, 1996-02 Classic representations of the city have focused on simplistic urban dichotomies such as renewal or decline poverty or prosperity and vice or vigor We are left with the question of what actually constitutes a city and what makes it and its people succeed or fail Recent writing on the city however has begun to question the images metaphors and discourses through which the contemporary city is represented Discussing recent visual architectural and spatial transformations in New York and other major world cities in relation to the themes of ethnicity capital and culture Re Presenting the City moves between interpretive representations of the newly emerging metropolis and the theoretical and methodological questions raised by the task of such representations Contributors with backgrounds in urban planning sociology cultural studies architecture art history geography and philosophy reflect on the construction of both the real and the unreal city the images metaphors and discourses through which the contemporary city is represented and the texts which both mediate our experience of as well as contribute to producing the city of the future

*Interpreting the Founding* Alan Ray Gibson, 2006 As politicians and judges argue over the original intent of our country s founding fathers the American Founding itself continues to inspire a prodigious amount of research and commentary reflecting a bewildering array of

methods and interpretations Alan Gibson now offers readers an insightful and convenient guide through this daunting and sprawling body of scholarship Comprehensive and judicious Interpreting the Founding provides summaries and analyses of the leading interpretive frameworks that have guided the study of the Founding since the publication of Charles Beard s An Economic Interpretation of the Constitution in 1913 Gibson argues that scholarship on the Founding is no longer steered by a single dominant approach or even by a set of questions that control its direction He also examines the challenges posed to Founding scholarship by this diversity and complexity and the possibilities opened by new avenues of inquiry that have recently emerged scholars of the Founding including Louis Hartz Bernard Bailyn Gordon Wood and Garry Wills that best exemplify different schools of interpretation Gibson focuses on six approaches that have dominated the modern study of the Founding Progressive Lockean liberal Republican Scottish Enlightenment multicultural and multiple traditions approaches For each approach he traces its fundamental assumptions revealing deeper ideological and methodological differences between schools of thought that on the surface seem to differ only about the interpretation of historical facts While previous accounts have treated the study of the Founding as the sequential replacement of one paradigm by another Gibson argues that all of these interpretations survive as alternative and still viable approaches each has simultaneously illuminated and masked core truths about the American Founding he renders a balanced account of the current debate over the origins and foundations of the American republic and offers solid footing on the path to understanding the vast literature devoted to this important subject
