the gathering My great wish is that this small book by the easy method of its contents may attract the attention of those persons who are yet unacquainted with my husband s writings of the men and women of leisure who although they may have heard of the Essays do not care to work their way through the nine volumes of others who would like to read them but who have either no time to do so or coin wherewith to buy them More especially do I hope that these selections may attract the attention of the working man whose cause my husband so ardently espoused and to whom he was the first to reveal by his free lectures the loveliness of Nature the many rainbow coloured rays of science and to show forth to his listeners how all these glorious rays unite in the one pure white light of holy truth
