discover causes of operational difficulties or problems for which more detailed remedial studies may be feasible. An appropriate work measurement technique may be used to evaluate alternatives or to locate major areas requiring improvement.

differentiated marketing—Marketing to different market segments with a different marketing strategy for each segment.

dimensions of quality—An aspect of quality that is specified to enhance the ability to define quality. The most commonly used list for products was created by David Garvin. His dimensions are aesthetics, conformance, durability, features, perceived quality, performance, reliability, and serviceability. The most commonly used list for service quality was created by Parasuraman, Zeithamel, and Berry. This list is assurance, availability, completeness, empathy, pleasantness, professionalism, responsiveness, service reliability, tangibles, and timeliness.

direct costing—Syn: variable costing.

direct costs—1) In traditional cost accounting, variable costs that can be directly attributed to a particular job or operation. Direct material and direct labor are traditionally considered direct costs. 2) In activity-based cost (ABC) accounting, a cost that can specifically be traced and is economically feasible to track to a particular cost object (e.g., the units produced, a production line, a department, a manufacturing plant). In contrast, if the cost must be allocated across various cost objects, it is an indirect cost. Based on the cost object under consideration, the classification of direct and indirect can change. ABC accounting assumes that more costs traditionally viewed as fixed costs are variable and can be traced to cost objects.

direct-deduct inventory transaction processing—A method of inventory bookkeeping that decreases the book (computer) inventory of an item as material is issued from stock, and increases the book inventory as transactions processed for each item. The key concept here is that the book record is updated coincidentally with the movement of material out of or into stock. As a result, the book record is a representation of what is physically in stock. Syn: discrete issue.
